I. INTRODUCTION.

HISTORICAL SKETCH.

THE earliest English architectural society of which we have record was a club called the Architects' Club, which was founded in 1791, and held its meetings at the Thatched House Tavern. The treasurer was Samuel Pepys Cockerell, father of Professor Cockerell (second President of the Institute), and grandfather of Frederick Pepys Cockerell (for many years Honorary Secretary). Among the original members were Sir William Chambers, Robert Adam, Robert Milne, John Soane, Thomas Hardwick, James Wyatt, George Dance, S. P. Cockerell.*

Later we find the London Architectural Society, established in 1806, probably the first institution formed by professional men with aims and objects similar to those of the present Royal Institute. By the rules of this Society members were required to produce annually, according to a rotation and time agreed upon, an architectural design never before in any way made public, consisting of at least one plan, elevation, and section, and accompanied with observations, critical and explanatory, under forfeiture of two guineas; also an essay on some subject connected with civil architecture, under forfeit of half-a-guinea. These designs, observations, and essays were discussed at General Meetings, and every member absenting himself for two successive nights was fined 5s., and also 5s. for every additional night of absence unless prevented by illness or a distance of ten miles from the place of meeting. The Society probably became extinct before the formation, in 1831, of the Architectural Society, which had for its governing body in 1834-35 William Barnard Clarke as President, Thomas Henry Wyatt as one of the Vice-Presidents, George Mair as Honorary Secretary, with Benjamin Ferrey among the ordinary members. The primary objects were the advancement and diffusion of architectural knowledge, and its ultimate intent to form a British School, with Library, Museum, Professorships and periodical exhibitions, the want of which was then beginning to be greatly felt by students. This existed in Lincoln's Inn Fields, when in 1834 it became evident to a few architects of established reputation that the profession required a more influential representative institution than that which already existed, and an Address was circulated among the profession pointing out that though few of the arts and sciences were left without a Body associated for their promotion and cultivation, Architecture, as an art embracing the whole circle of the sciences, was in this country destitute of such an establishment. The R.I.B.A. thus came into being, and the junction of the Architectural Society with it was effected in 1842.

The first meeting of the founders of the Institute was held at the Thatched House Tavern, St. James's Street, on the 2nd July 1834, when the Address setting forth the aims and objects of the proposed Institute was adopted.

*See article by Mr. Harry Sirt, JOURNAL R.I.B.A., 7th January 1911.

Endeavour was made to secure as members architects of prominent position and unimpeachable character, educated for and following their profession as an art, and free from those conflicting relations with trade which frequently existed in the early part of the century and prevented that implicit confidence on the part of the public which should enable a client to regard his architect not only as his agent, but as his friend and adviser. A prominent part in the foundation was taken by Professor T. L. Donaldson, whose letter convening the preliminary Meeting was as follows :—

7 Hart Street, Bloomsbury Square : 8th May 1834.

DEAR SIR,—Some of the following gentlemen, all of whom, as well as yourself, have received a circular from Mr. Robinson, are anxious to have a preliminary Meeting to talk over and consider the objects and prospects of the proposed Institution of British Architects, and will meet at Mr. Rainy's room, 14 Regent Street, on Tuesday evening next, at half-past seven o'clock, when the favour of your attendance is earnestly desired. The chair will be taken at eight o'clock precisely.—I am, my dear Sir, yours very faithfully,

THOS. L. DONALDSON.

The names appended were Messrs. Atkinson, *Barry*, *Basevi*, *Bellamy*, *Blore*, *Decimus Burton*, *Cresy*, *Fowler*, *Goldicutt*, *Gwilt*, *Hardwick*, *Kay*, *Kendall*, *Lee*, *Papworth*, *Parker*, Sir John Rennie, *Rhodes*, *Robinson*, *Seward*, *Taylor*, and *Wallen*. The italics denote those who attended.

A second meeting, for the enrolment of members, was held on the 6th August 1834; and the Council, elected by ballot on the 3rd December following, and consisting of Messrs. Robinson, *Kay*, and *Gwilt* as Vice-Presidents, Messrs. Donaldson and Goldicutt as Honorary Secretaries, and Messrs. *Barry* (afterwards Sir Charles Barry), *Basevi*, *Decimus Burton*, *Fowler*, *Philip Hardwick*, *Kendall*, *J. B. Papworth*, and *Rhodes*, met for the first time on the 10th December at the Thatched House Tavern. A few weeks afterwards the Earl de Grey was elected President.

The opening General Meeting of the Institute was held on the 15th June 1835. The President's Address, with that afterwards delivered by Professor Donaldson, will be found in the Institute TRANSACTIONS. Sir John Soane, Professor of Architecture at the Royal Academy, evinced his sympathy with the newly established body by giving a donation of £750 for such purposes as might appear most conducive to its advantage. Professor Donaldson was the last surviving original member of the Institute, and died in 1885.

The Royal Charter was granted by King William IV on the 11th January 1837. On the 8th August of the same year Queen Victoria became Patron, and was subsequently associated with the Prince Consort, who at all times manifested his interest in the Institute's proceedings, on one occasion, in 1842, acting as Chairman of the Council Meeting and afterwards presiding at the General Meeting.

A further and lasting mark of the Royal favour was shown in 1848 by the foundation by Queen Victoria of the Royal Gold Medal, since annually

conferred by the Sovereign on some distinguished architect, or man of science or letters connected with architecture, on the recommendation of the Institute.

On the 18th May 1866 by Royal command the style of the Institute was altered to the "Royal" Institute of British Architects.

King Edward VII, Patron from 1863 till his death in 1910, continued the presentation of the Annual Gold Medal.

His present Majesty King George V, on his accession to the Throne, graciously intimated his pleasure to continue the Royal Patronage and the presentation of the Gold Medal.

In 1887, in order to bring the powers of the Institute more into line with the work it aspired to accomplish, and to render the fact of membership to a certain extent a test of proficiency, the Supplemental Charter of the 50th Victoria, conferring among other privileges power to hold examinations and issue certificates or diplomas, was granted, the document receiving the Royal Sign Manual on the 28th March 1887.

A further Supplemental Charter (8th Edward VII), granted 11th January 1909, provided for a temporary class of Licentiates to be elected by the Council, made fresh provisions respecting the qualifications of candidates for Fellowship and the granting of diplomas, and extended the educational functions of the Institute.

In 1924 the proposals of the Council for the amalgamation of the R.I.B.A. and The Society of Architects with a view to the unification of the profession and the promotion of a Registration Bill were approved by the general body of the R.I.B.A. and by The Society of Architects.

The Supplemental Charter enabling the amalgamation agreement to be carried into effect received His Majesty's sanction in February 1925. Among other important provisions the new Charter also enabled Licentiates to be constituted as full corporate members, gave equal voting rights to all Fellows, Associates and Licentiates, and entitled them to use the title "Chartered Architect." It further provided for the formation of a non-corporate class of subscribers, and gave the Council power to take a Referendum on important issues.

The new Bye-laws were approved at a meeting of the Privy Council on the 4th March 1925, and among certain other improvements in the machinery of the R.I.B.A. provided for the reconstitution of the Council, so as to secure representation for all sections of membership and for the Allied Societies.

Following on the completion of the provisions of the amalgamation agreement The Society of Architects went into voluntary liquidation in June 1925, and thereupon property of the value of over £10,000 was transferred to the R.I.B.A. This included the Society's leasehold premises at No. 28 Bedford Square, and invested funds amounting to £4,588, of which £3,263 was earmarked for developing and maintaining architectural scholarships.

In 1928 proposals were formulated for obtaining the sanction of the Privy Council to the reopening of the Licentiate Class under the same conditions of admission as existed in 1910-1912, and for certain reforms in the method of government of the R.I.B.A.

Extensive alterations in the existing Bye-laws were necessary in order to bring the proposals into effect, and in June 1929 draft revised Bye-laws embodying the proposals were approved, under the provisions of the

Supplemental Charter of 1925, by a postal vote of all the members in the United Kingdom and the Irish Free State, and the revised Bye-laws were sanctioned by the Privy Council on the 2nd July 1930.

Further minor amendments to the Bye-laws were considered in 1930, including provision for the formation of a Class of Retired Associates and Retired Licentiates. These amendments were approved by the Privy Council on the 23rd February 1931.

In 1932 amendments revising the Forms of Declaration to be signed by Members were approved. In 1933 further amendments affecting the period of office of Vice-Presidents, providing for the election of an Hon. Treasurer, and the addition of the Chairman of the Architects' Registration Council as ex-officio Members of Council, were also approved.

In 1934 amendments in the Bye-laws governing the Council's procedure in the investigation of charges affecting professional conduct, and providing for the addition of the Chairman of the Competitions Committee as an ex-officio member of the Council, were approved.

The Registration Bill was passed in the Parliamentary Session of 1930-1931, and the Royal Assent was given on 31st July 1931. The Act took effect on 1st January 1932.

THE INSTITUTE PREMISES.

The first rooms of the Institute, engaged early in 1835, were at 43 King Street, Covent Garden, better known as Evans's Hotel, a building said to have been designed by Inigo Jones, and immortalised by Thackeray in *The Newcomes*, in the description of "The Cave of Harmony." In 1837 rooms were taken at No. 16 Grosvenor Street, where for twenty-two years the work of the Institute was carried on. The necessity of acquiring larger and more convenient premises led eventually to the formation of the Architectural Union Company, which was established, in the terms of its articles of association, "for the purpose of providing accommodation for the different societies connected with architecture, and especially for the Royal Institute of British Architects and the Architectural Exhibition."

The Architectural Union Company purchased No. 9 Conduit Street and the R.I.B.A. established itself there in 1859. In the course of time the Union Company died, and the R.I.B.A. took over the premises first as lessees of the City Corporation and later as freeholders and gradually added to the buildings by extending towards the rear of the site to make room for the growing activities of the Institute.

Even before the war the problem of accommodation had become acute and the Council had considered making a move or rebuilding in Conduit Street; but about seven years ago it was realised that no extension or even rebuilding on the Conduit Street site could solve the problem and a serious search was made first for an existing building which could be adapted for the Institute and then for a site for an entirely new building.

In 1929 the Weymouth Street-Portland Place site was purchased on a 999 years building lease from the Howard de Walden estate, the competition for the new building was held in 1931-32 and Mr. Grey Wornum chosen as architect. The new building was opened on 6th November 1934 by His Majesty the King.

The full history of the R.I.B.A. buildings has been told in the Centenary History* and the Centenary Number of the R.I.B.A. Journal† where it may be studied by anyone who wishes to learn more.

CODE OF PROFESSIONAL PRACTICE.

(As revised 24th June, 1935.)

A member of the R.I.B.A. is governed by the Charter and Bye-laws of the Royal Institute. The following clauses indicate in a general way the standard of conduct which members of the R.I.B.A. must adhere to, failing which the Council may judge a member guilty of unprofessional conduct, and either reprimand, suspend or expel him or her.

Cases of unprofessional conduct not specifically covered by these clauses are dealt with by the Council having regard to the particular circumstances of the case.

1. An Architect is remunerated solely by his professional fees, and is debarred from any other source of remuneration in connection with the works and duties entrusted to him. It is the duty of an Architect to uphold in every way possible the Scale of Professional Charges adopted by the Royal Institute.

2. An Architect must not accept any work which involves the giving or receiving of discounts or commissions, nor must he accept any discount, gift or commission from contractors or tradesmen, whether employed upon his works or not.

An Architect may be architectural consultant, adviser, or assistant to building contractors, decorators, furniture designers, estate development firms or companies, or firms or companies trading in materials used in or whose activities are otherwise connected with the building industry, provided that:—

(1) He is paid by salary or fee and not by commission.

(2) He does not either directly or indirectly solicit orders for the firm or company.

He may use his affix in connection with his appointment and his name and affix may appear on the stationery of the firm or company as architectural consultant or adviser.

His name and affix may appear in advertisements inserted by the firm or company in the press provided that it is done in an unostentatious manner.

An Architect may be a director of any company, including a building society registered under the Building Societies Acts, except a company trading in materials used in or whose activities are otherwise connected with the building industry or engaged in the financing or erection of buildings.‡

* "The Growth and Work of the Royal Institute of British Architects," edited by J. A. Gotch.

† R.I.B.A. Journal, 6th November 1934, pp. 5-17.

‡ NOTE.—The regulation with regard to directorships will come into force as from 23rd March 1935, but in cases where Architects are already directors of companies carrying on any of the above excepted trades or businesses (1) the regulation will not become effective until 23rd March 1937, and (2) until that date the provisions of Clause 2 of the Code as it appeared before revision on 23rd March 1935 must be complied with, viz. "If an Architect own or have a commercial interest either as a director of a company, or as a consultant or adviser or as a shareholder, in any material, device, or invention used in a building, he must inform his client thereof, and must obtain his sanction before specifying the use of it in works under his direction."

His name and affix may appear on the notepaper of the company.

An Architect may not carry on or act as principal, partner or manager of any firm carrying on any of the above excepted trades or businesses.

3. (a) An Architect must not advertise nor offer his services by means of circulars or otherwise, nor may he make* paid announcements in the Press. He may, however, notify his correspondents by post once of any change of address.

(b) Though there is no objection to an Architect allowing signed illustrations and descriptions of his work to be published in the Press, with reference to such illustrations or descriptions, it is contrary to professional ethics—

(1) To give monetary considerations for such insertions.

(2) To allow such insertions to be used by the publishers for extorting advertisements from unwilling contributors.

(c) An Architect may consent to the publication of a series of illustrations either in circular, brochure or book form, with or without descriptive letterpress, of any building or buildings for which he has been responsible, provided that—

(a) if advertisements appear, Clause 3 (b) (2) of the Code is complied with, and

(b) there is no attempt to distribute the publication to potential clients.

(d) An Architect may sign his buildings and may exhibit his name outside his office and on buildings in course of construction, alteration and/or extension provided that it is done in an unostentatious manner and the lettering does not exceed 2 inches in height.

If the client so desires the Architect's name may remain upon the building for a period not exceeding 12 months after its completion providing that the board does not display "To Let" or "For Sale" or similar notices. A notice may, however, indicate that the plans can be seen at the Architect's office.

Auctioning and House Agency are inconsistent with and must not form part of the practice of an Architect.

(e) Architects who are appointed Surveyors to recognised estates† may announce land or sites or premises for sale or letting in connection with their appointments.

When Architects are acting as Surveyors or Town Planners in connection with the development of land, announcements may be made in the Press and on notice boards in connection with such development, provided that such announcements are made in an unostentatious manner.

4. An Architect must not attempt to supplant another Architect, nor must he compete with another Architect by means of a reduction of fees or by other inducement.

5. An Architect on being approached to proceed with professional work upon which another Architect was previously employed shall notify the fact to such Architect.

* NOTE.—This does not refer to advertisements or letters respecting appointments open or wanted, nor to the insertion of one notice of change of address in the professional press.

† The term "recognised estates" is intended to apply to family and trustee estates such as the Bedford, Grosvenor, Berners and Howard de Walden Estates.

6. In all cases of dispute between employer and contractor the Architect must act in an impartial manner. He must interpret the conditions of a contract with entire fairness as between the employer and the contractor.

7. An Architect must not permit the insertion of any clause in tenders, bills of quantities, or other contract documents which provides for payment to be made to him by the contractor whatever may be the consideration, unless with the full knowledge and approval of his client.

8. An Architect should not take any part in a competition as to which the preliminary warning of the Royal Institute has been issued, and must not take any part in a competition as to which the Council of the Royal Institute shall have declared by a Resolution published in the JOURNAL of the Royal Institute that Members must not take part because the Conditions are not in accordance with the published Regulations of the Royal Institute for Architectural Competitions, nor must he be associated in any way with the carrying out of a design selected as the result of a competition as to which the Council shall have declared by a Resolution published in the JOURNAL that Members must not take part.

Architects asked to take part in a limited competition must at once notify the Secretary of the R.I.B.A., submitting particulars of the competition.

Note.—A formal invitation to two or more architects to prepare designs in competition for the same project is deemed a limited competition.

9. An Architect must not act as Architect or Joint Architect for a work which is or has been the subject of a competition in which he is or has been engaged as Assessor.

An Assessor must not act as Consulting Architect, unless he has been appointed as such before the inception of the competition, nor in any other professional capacity in any matter connected with the work which has been the subject of the competition, provided always that he may act as Arbitrator in any dispute between the Promoters and the selected Architect.

If an Architect is officially approached by the Promoters for advice as to the holding of a competition with a view to his acting as Assessor, and eventually it is decided not to hold a competition but to appoint an Architect to carry out the work, the Architect originally approached in an advisory capacity is precluded from acting as Architect for the work in question.

10. It is desirable that in cases where the Architect takes out the Quantities for his buildings he should be paid directly by the client and not through the Contractor except with the previous consent of the client.

For Scales of Charges and other documents see pp. 731 onward.

THE Architectural Association (London), founded in 1847, is carried on under the authority of the Literary and Scientific Institutions Act 1854. Its objects are to provide facilities for the study of Architecture, and to serve as a medium of friendly communication between members and others interested in the study and progress of Architecture.

The President for the time being of the Architectural Association, providing he be a Fellow or an Associate of the Institute, is annually nominated as a member of the Council of the Royal Institute of British Architects.

The work of the Association is carried on at 34, 35, and 36 Bedford Square, W.C.1, where the General Meetings are also held. The Association possesses an extensive library which is available to members, arranges an annual excursion abroad and holds a continuous series of exhibitions, during the winter months, of modern architecture from other countries, decoration, etc., etc. The premises at No. 36 Bedford Square are equipped as a club, where there is a dining-room, members' reading-rooms, coffee-room, etc.

The School of Architecture, which is under the sole control of the Council of the Association, is under the direction of Mr. Howard Robertson, S.A.D.G. [F.], *Director*, with Mr. E. A. A. Rowse, A.M.T.P.I. [A.], *Assistant Director*, assisted by qualified masters and staff.

The School provides for five years of study, covering the entire field of Design, Construction, Decoration, and Architectural Research.

The aim of the School is to provide for its students not only theoretical instruction in the Design and Engineering sides of architecture, but so to arrange its curriculum that the students, during their instruction, may find ample opportunity to gain practical experience in outside work or in the offices of practising architects.

The Council of the R.I.B.A. accept the Certificate issued upon satisfactory completion of the first three years of the Day School as granting exemption from the R.I.B.A. Intermediate Examination. The A.A. Diploma, issued on satisfactory completion of the full Five Years' Course, entitles the holder to exemption from the R.I.B.A. Final Examination. On securing this exemption the holder becomes eligible for nomination for Associateship of the R.I.B.A., subject to completion of twelve months' practical experience, and Registration under the Architects' (Registration) Act, 1931.

THE ARCHITECTURE CLUB.

THE purpose of the Architecture Club is to enlarge public appreciation of good architecture and the Allied Arts, and especially of the best work of to-day.

Members are either (a) architects, or (b) writers, or (c) persons interested in furthering good building, and membership is divided as near as may be equally among these three classes.

Council, 1934-35 :—

THE ARCHITECTS' AND SURVEYORS' APPROVED SOCIETY.

NATIONAL HEALTH AND PENSIONS INSURANCE.

(Approval Number 374.)

26 BUCKINGHAM GATE, LONDON, S.W.1.

THIS Society was formed in 1912, with the approval of the Ministry of Health, and accepts for membership men and women resident in England who come within the scope of National Health and Pensions Insurance, i.e., those in receipt of a salary not exceeding £250 per annum.

CONTRIBUTIONS.

The contribution for men is 1/6 per week, 9d. of which is payable by the employer; and for women 1/1 per week, 7d. of which is payable by the employer.

ORDINARY BENEFITS.

The ordinary benefits, as specified in the Acts, include sickness, disablement and maternity benefits; also pensions for widows and allowances for orphans. The Old Age Pension is payable for life at the rate of 10/- per week to an insured person on attaining the age of 65; also to the wife of an insured person after she and her husband have attained that age, irrespective of means.

ADDITIONAL BENEFITS.

The last Government valuation of the Society's assets having disclosed a large surplus, the following scheme of additional benefits has been brought into operation, with the sanction of the Ministry of Health:—

Sickness Benefit : 20/- per week for men, and 17/- per week for women.

Disablement Benefit : 10/- per week for both men and women.

Maternity Benefit : £2. 10s.

Grants are also made to members entitled to "additional benefits" towards the cost of any dental and optical treatment required. Such members requiring dental treatment should first of all apply to the Society for a "dental letter," and, in the case of the other treatment, etc., should submit an estimate of cost of same, before treatment is commenced. Grants are also made under this scheme towards the cost of glasses and artificial teeth.

As these "additional benefits" are paid out of the profits of past years those now joining the Society cannot expect to receive immediately such benefits.

Further particulars and forms of application for membership may be obtained from the undersigned.

The members are appointed for a term of five years, and are eligible for re-appointment. Appeal may be made to the Tribunal under the

several sections set out in the London Building Act 1930 (20 & 21 Geo. 5, Chap. clviii), the Tribunal having power to hear the parties interested in person, or by counsel, solicitor, or agent; to administer oaths; to hear and receive evidence; to require the production of documents or books; and to confirm, reverse, or vary any decision appealed against, and to make any such order as they may think fit, also to order costs in their discretion.

When any question of *law* is involved in any appeal submitted to them, the Tribunal may, on the request of the parties, and if ordered by the High Court, or a Judge thereof, on application in a summary manner made by any party to the appeal, shall state a case for the opinion of the High Court, which shall hear and determine any such question of law, and thereupon reverse, affirm, or amend the decision of the Tribunal, or remit the matter to them with the opinion of the Court on the case stated, or make such other order as to the matter and as to the costs of the case as the Court sees fit.

Any order of the Tribunal may be enforced by the High Court as if it had been an order of that Court.

ii. THE ALLIED SOCIETIES

See Map facing.

THE non-Metropolitan Societies allied to the Royal Institute of British Architects [see Bye-laws 76-80] are forty-nine in number, thirty-one being located in Great Britain and Ireland, four in South Africa, one in East Africa, one in Rhodesia, seven in Australia, and one each in New Zealand, Canada, Burma, India, and Malaya. Each Allied Society is the accredited centre of a district, and the agent of that district in its relations with the heart of the system in London. (*See Presidential Address, 1893-94: Journal Vol. I, 3rd Ser., p. 4.*)

ENGLAND.

THE BERKS, BUCKS AND OXON ARCHITECTURAL ASSOCIATION.

(*Year of Alliance, 1921.*)

[*Province: The Counties of Berkshire, Buckinghamshire, and Oxfordshire.*]

Hon. Secretary.

A. Buller West [F.], The Knowl, Abingdon, Berks.

The Berks, Bucks and Oxon Architectural Association was founded in June 1921, its objects being: (a) The advancement of architecture and the promotion and encouragement of its study and appreciation; (b) the care and protection of the interests of the architectural profession; (c) the provision of a medium of friendly communication between its members and others interested in architecture, and of mutual assistance, by consultation, advice or mediation, in professional questions amongst architects in the three counties. The membership consists of Fellows, Associates, Students, Associate Craftsmen, Hon. Members and Retired Fellows.

- (a) Fellows must be practising Architects, not combining any other business with their profession of Architecture except that of Land and Quantity Surveying or Civil Engineering, and must be Members of the Royal Institute of British Architects, must either have served Articles to Architects of recognised qualifications, or passed successfully through the Course at a "Recognised School." In any special case the Council may relax this rule.
- (b) Associates must be Architects' Assistants who have been engaged at least six years in the study or practice of Architecture. Associates who are Members of the R.I.B.A. shall be eligible for election as Fellows.

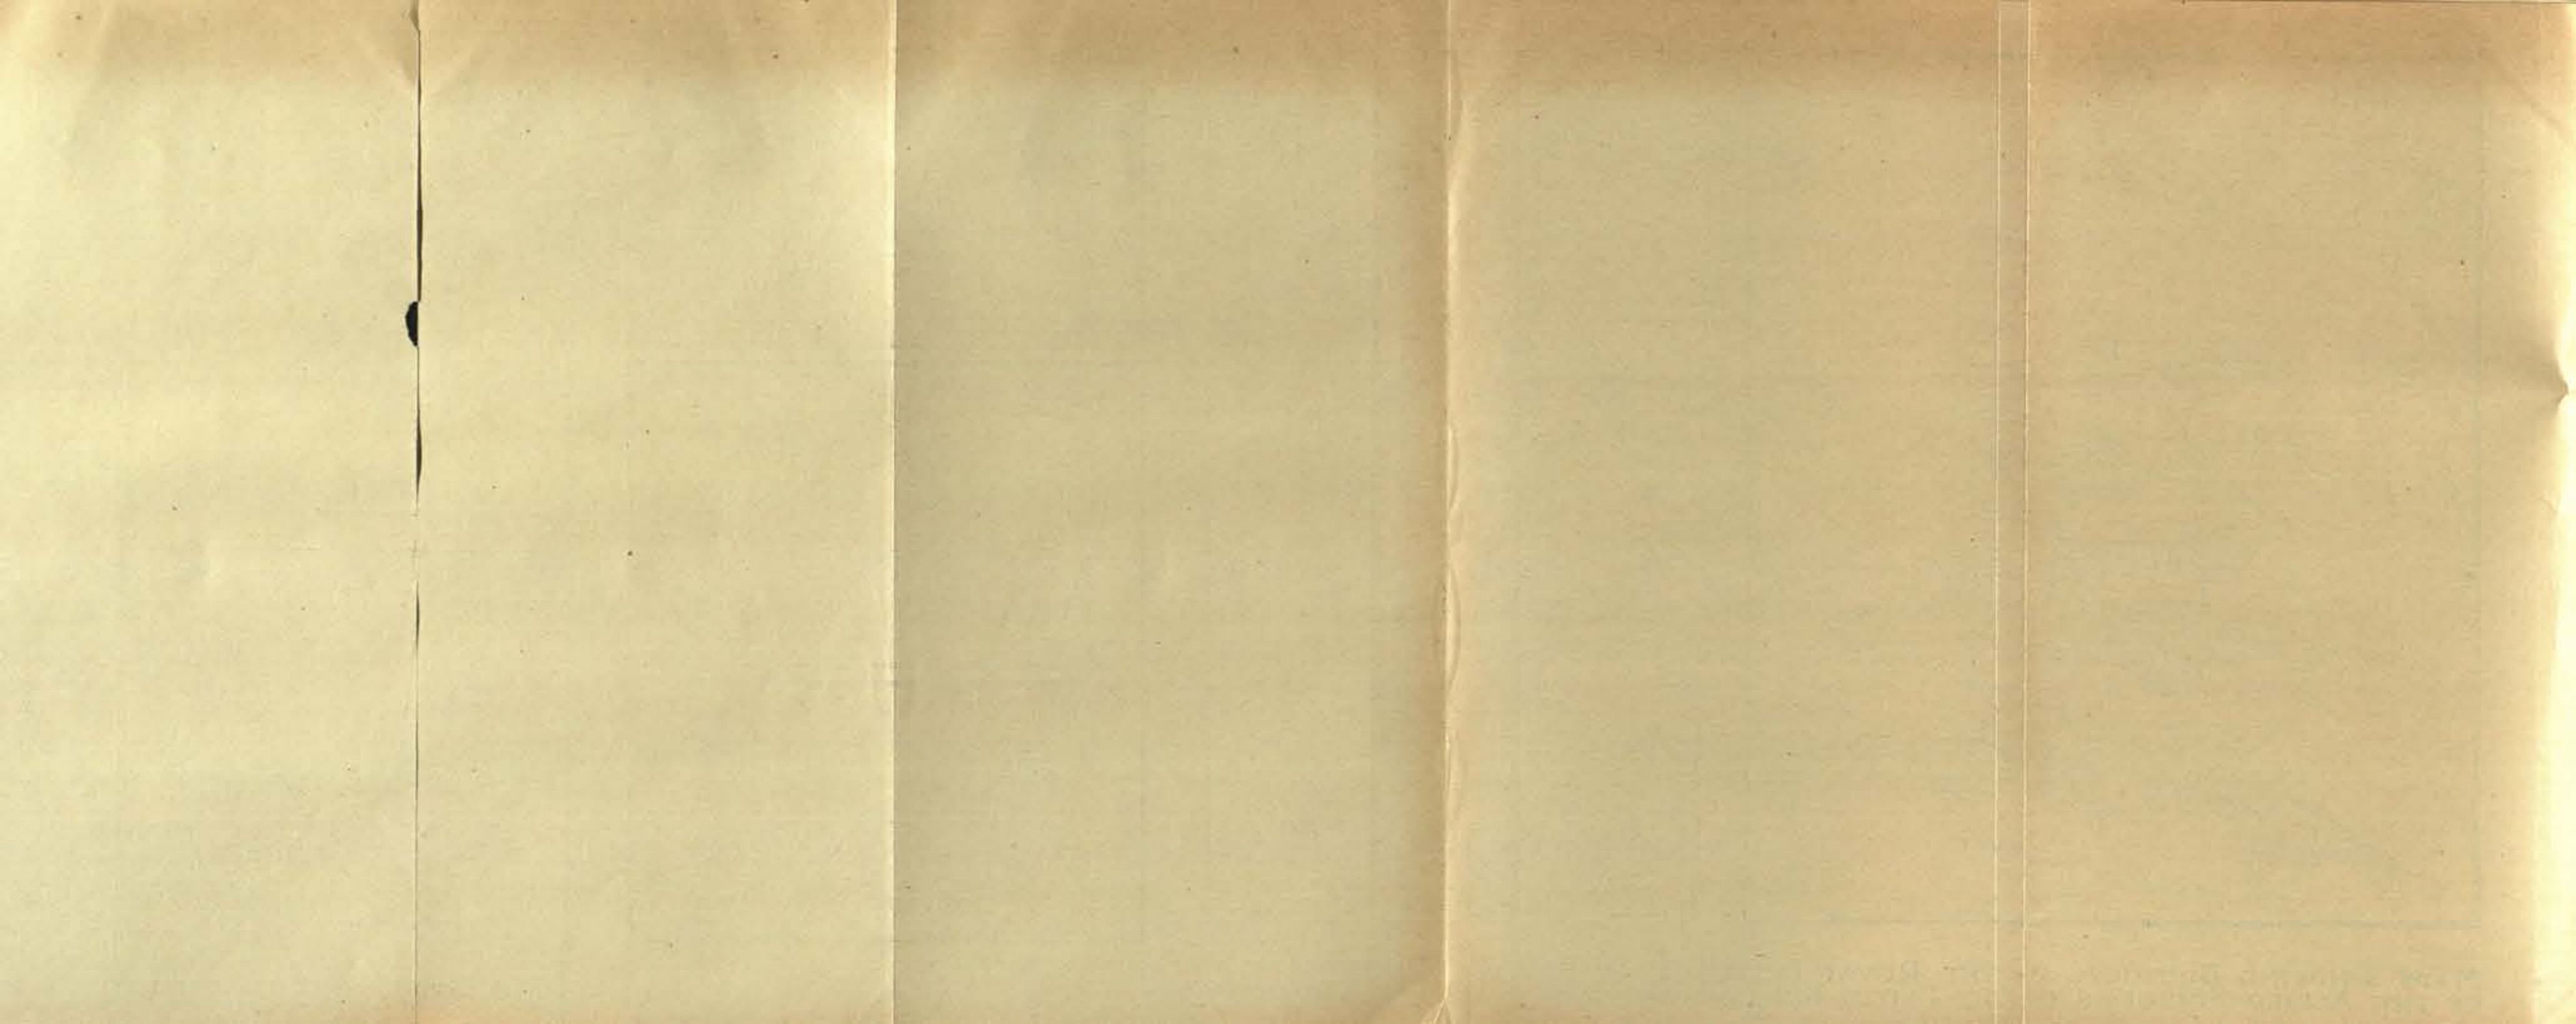

Provision is made in the Bye-laws for the formation of Branches either for the whole or any of the aforesaid counties with the capital town of the county as centre, or for Districts having an important city or town for centre, as may be determined by the localities affected, subject to the Council's approval. Branches already formed are the following:—

Berks Society of Architects (94 members).

Bucks Society of Architects (67 members).

Oxfordshire Society of Architects (60 members).

Each Branch has its own executive. The Council of the Association refunds to the respective Branches half the annual subscriptions received

from the members of each Branch, these sums to be used for Branch working expenses. Each county may appoint four representatives on the Council, not more than two representatives to be elected from one Branch. Any Branch having a membership of more than thirty (Fellows, Associates or Students) may appoint one additional representative for every fifteen additional members above thirty. The Council meets every three months, or upon request of three Members of Council, at Reading, Oxford or High Wycombe, as arranged by the Council. The Annual General Meeting of the Association is held either in Berks, Bucks or Oxfordshire in the month of April.

The Birmingham Architectural Association was founded in 1873 for the promotion of union and professional integrity among its several classes of members ; the establishment, as far as possible, of uniformity of practice ; the general advancement of architecture, and of the arts and sciences connected therewith. The Association consists of Fellows—architects who have been in practice at least three years ; Associates—architects not eligible as Members and architects' assistants ; Students—persons under twenty-one years of age engaged in the study of Architecture, articled pupils, or registered students of the Birmingham School of Architecture ; Honorary Members—persons who are not architects, but interested in architecture and the allied arts ; Subscribers—persons engaged in the various crafts connected with the architectural art. General Meetings are held fortnightly on Fridays from the months of October to March.

Through the efforts of the Birmingham Architectural Association a School of Architecture has been founded at the Municipal School of Art, Birmingham, under the Directorship of Mr. George Drysdale [F].

Sketching excursions are arranged for students, visits made to old buildings and to buildings in progress, and prizes offered for reports and sketches of the buildings visited. A permanent room is available for meetings, and the Library is open during the day.

DEVON AND CORNWALL ARCHITECTURAL SOCIETY.

(Year of Alliance 1891.)

[Province : Devon and Cornwall. Headquarters : Exeter.]

Hon. Secretary.

John Challice, P.A.S.I. [A.], 7 Bedford Circus, Exeter.

The Devon and Cornwall Architectural Society, formerly known as the Devon and Exeter Architectural Society, was founded in 1890. The title was altered in 1926, when rules, in accordance with those suggested by the Royal Institute of British Architects, were adopted to take the place of those formerly in force. The objects of the Society are :—

To advance the art and profession of Architecture.

To consider and safeguard matters of Professional Practice.

To maintain and uphold the code of professional charges as laid down by the Royal Institute of British Architects.

To promote and afford facilities for the study of Architecture and to serve as a medium of friendly communication between the members and others interested in the progress of Architecture.

The membership consists of Fellows, Associates, Students and Honorary Members. *Fellows* must be practising Architects, not combining any other business with their profession of Architecture, except those of Land and Quantity Surveying, Land Agency and Valuing and Civil Engineering, and must either have served Articles to Architects of recognised qualifications, or be Members of the Royal Institute of British Architects, or Architects' Assistants who are Associates or Licentiates of the R.I.B.A. unless the Council shall see reason to relax this rule in any special case. *Associates* must be Architects' Assistants over 21 years of age. *Students* must be Architects' Articled pupils, or day Students in any recognised Architectural School. *Honorary Members* must be persons who have rendered or may be in a position to render to Architecture and to the Devon and Cornwall Architectural Society such service as, in the opinion of the Council, entitle them to that distinction.

The area covered by the Society is divided into two districts, each forming a distinct branch. The branches are called "Exeter" and "Plymouth," and members may elect to belong to either branch. The centres are at Exeter and Plymouth respectively, and each branch has its own executive. Sessional Meetings are held from September to April. The Society is governed by a Council consisting of Officers elected annually and representatives nominated by the branches. The Society possesses a library for the use of members

and prizes are offered annually to Associates and Students for Measured Drawings.

A School of Architecture has been established since 1928 at the Central School of Arts and Crafts, Plymouth, by the Plymouth Education Authority and the R.I.B.A. has recognised the school by exempting Students from submission of the prescribed testimonies of study for the Intermediate Examination.

The Essex Society of Architects was founded in 1927, and admitted to alliance with the Royal Institute in 1928. It was originally composed of four Chapters situated at Southend, Colchester, Chelmsford and West Essex. In 1929 the title of the Society was changed on the formation of Chapters in Cambridge and Hertfordshire. The Society is governed by a Council composed of representatives from each Chapter. The Bye-laws conform very closely to those enforced by the Berks, Bucks and Oxon Society, and the Society possess the following classes of membership:—Members, Associate Members, Students, Associate Craftsmen and Honorary Members.

Each Chapter has its own executive and the Council of the Society retains a certain proportion of the subscriptions received from members of the Chapters, the balance being reserved for working expenses.

The Council meets four times in the year fourteen days before each General Meeting, and the Annual General Meeting is held in the area or Chapter possessing the President and Honorary Secretary for the year.

Lectures and visits to places of interest form part of the programme, and much interest is taken in the cause of architectural education.

HAMPSHIRE AND ISLE OF WIGHT ARCHITECTURAL ASSOCIATION.

(Year of Alliance 1912.)

[Province: Hampshire, Isle of Wight and the Channel Islands.

Headquarters: Southampton.]

Hon. Secretary and Treasurer.

A. L. Roberts [F.], The Castle, Winchester. [Tel.: Winchester 1005,
Ext. 70; (House) 510.]

The Hampshire and Isle of Wight Architectural Association, founded in 1912, exists for the promotion of union and professional integrity among its several classes of members, the establishment as far as possible of uniformity of practice, and the general advancement of Architecture and the various Arts and Sciences connected therewith. The Association consists of three classes of members—(1) *Fellows*, who must be Chartered Architects, or Architects or Quantity Surveyors who have been engaged in practice for not less a period than three years; (2) *Associates*, being other Architects, Assistants, or Pupils engaged in architectural work; (3) *Honorary Members*, being persons other than practising Architects or Quantity Surveyors, who are interested in the art of Architecture.

No person engaged in any of the trades connected with building is eligible for admission as Fellow or Associate.

The Council meets quarterly. Six General Meetings are held during the year, and are usually arranged in connection with visits to places of architectural interest in the summer months and lectures in the winter. The Annual General Meeting is held in April.

NORTHERN ARCHITECTURAL ASSOCIATION.

(Year of Alliance 1889.)

6 Higham Place, Newcastle-upon-Tyne.

[Province: Northumberland, Cumberland, Durham, and the County Borough of Middlesbrough. Centre: Newcastle.]

Hon. Secretary.

F. A. Child [A.], 22 Ridley Place, Newcastle-upon-Tyne.

The Northern Architectural Association was founded in 1858, and the rules and constitution were revised in 1885, and again in 1911 and 1921. The objects of the Association, as stated in the new rules, are to promote union amongst the members; the elevation of the profession of Architecture; the establishment of uniformity of practice and professional charges; and the general advancement of the art and science of Architecture. There are 423 Members in the Association, consisting of four classes, viz.:—*Members*, architects in practice as principals, or as town or country architects, who have so practised for not less than three consecutive years immediately preceding their nomination; *Associates*, architects not yet eligible as Members or assistants (over twenty-one years of age) in the offices of gentlemen eligible as Members or Associates; *Students*, persons engaged in the study of Architecture who are registered as Probationers of the R.I.B.A. and not exceeding the age of twenty-one years, except when they are still pupils and exceed that age; and *Honorary Members*, gentlemen eminent for distinguished attainments recommended by the Council. Members and Associates only have the right to vote. Under the Glover Trust the Council offer:—

The Glover Travelling Studentship, the Glover Medal, and a Prize of Twenty-five Guineas open to Students or Associates for Architectural Study in the United Kingdom, or abroad.

There is a Students' Club in connection with the Association, and a library. The session commences in October, and meetings, at which Papers are read and professional questions discussed, are held in each month up to and including March of the following year. The Annual General Meeting is held in May or June.

Headquarters : St. Moritz, The Upper Avenue, Eastbourne. [Eastbourne 2789.]

The South-Eastern Society of Architects was founded in 1928, as one of the Allied Societies of the Royal Institute of British Architects. Its members practise or reside in the Counties of Kent, Surrey, and Sussex. Its activities appeal to both professional and non-professional members. Its main objectives are: The beautifying of our surroundings and the preservation of Rural England. Its functions are:—(a) To maintain an intensive propaganda to enable the public to appreciate good architecture and to encourage its study and advancement. (b) To teach architectural design and construction. (c) To constitute advisory Panels of Architects to which local authorities can refer questions of town-planning and architectural design.

Monthly social meetings are held for practising architects in the more important towns, where professional advice is exchanged. Atelier Clubs for developing architectural design are organised in Brighton, Canterbury, Croydon, Farnham, Guildford, Hastings and Worthing. These are intended primarily for assistants and others who are preparing for the R.I.B.A. examinations and who are unable to attend a regular architectural course.

Members are strongly advised to join the Society's Correspondence School of Town Planning, which is obtaining most satisfactory results at the Town Planning Institute examinations.

The Bristol Society of Architects was established in 1850, and reorganised in 1888. The Society exists for the purpose of maintaining the interests of the profession; for the educational advancement of local students; for the formation of a Library; and for insuring a uniformity and respectability of practice. The Members consist of *Fellows*—architects who have attained the age of thirty years, and who have been engaged as principals for at least five successive years in the practice of architecture; *Associates*—persons engaged in the study or practice of architecture who have attained the age of twenty-one years; *Honorary Associates*—persons not professionally engaged in practice as architects, who, by reason of their interest or ability in art, science, literature, or archæology, or their experience in matters relating to architecture or building, may appear to the Council to be able to render assistance in promoting the objects of the Society; *Students*—persons engaged in the study of architecture, and who are not less than sixteen years of age. Students have the privilege of attending ordinary meetings of the Society and of joining in discussions, but have no voice in the control of the Society's affairs. All Students are expected to qualify themselves for passing the Examinations of the R.I.B.A. The Annual General Meeting is held early in February, and monthly meetings are held from October to March, at which Papers are read and the business of the Society transacted. The Society, in collaboration with the Royal West of England Academy, was instrumental during the year 1920-21 in establishing the School of Architecture of that Academy, opened by H.R.H. the Prince of Wales on 10th July 1921. The school is carried on at the premises at No. 25 Great

George Street, Park Street, where the Bristol Society of Architects have their headquarters, and is open to students of Architecture irrespective of sex. It is affiliated with the school of the Architectural Association of London, and is now guaranteed financially by the Royal West of England Academy. It is controlled as to its educational policy and curriculum by a Council composed of members of the Council of the Society and Members of the Academy Council. The curriculum closely follows that of the school of the Architectural Association; the general system of education is, however, that of combined apprenticeship to a practising architect and school work, though special cases are dealt with on their merits, and apprenticeship and office work are not compulsory. The four years part-time and three years whole-time courses are recognised for exemption from the R.I.B.A. Intermediate Examination.

The York and East Yorkshire Architectural Society was founded in 1882, the objects being to afford facilities for the study of Architecture, sanitary engineering, and other subjects identified with the architectural profession; and to advance the professional interest of the members. It has endeavoured to carry out these objects by means of (1) Papers and discussions upon all subjects and questions connected directly and indirectly with Architecture; (2) The preservation of ancient and historical architectural monuments and buildings; (3) The advancement and encouragement of professional knowledge and study in the younger members of the profession by the foundation of classes for study and the award of prizes for satisfactory work; visits to works in progress, and to buildings ancient and modern; sketching, and such other methods as may be determined from time to time. Further, by supporting and protecting the character and uniformity of practice of the profession, and promoting personal acquaintance and good feeling between the members and honourable conduct in the profession generally. The members consist of four classes, viz., *Fellows*—architects who have been in practice at least three consecutive years, or hold chief public appointments; *Associates*—persons who are engaged in the study and practice of Architecture, who are not eligible as Fellows; *Students*—persons engaged in the study of Architecture as pupils (or assistants not yet twenty-one years of age); *Honorary Members*—those who have any direct or indirect interest in Architecture, or in some of the collateral arts and sciences. The Annual General Meeting is held in April.

SCOTLAND.

THE ROYAL INCORPORATION OF ARCHITECTS IN SCOTLAND.

Telegraphic Address: "Architects, Edinburgh."

(Year of Alliance 1921.)

Secretary and Treasurer.

A. Nicol Bruce, W.S., 15 Rutland Square, Edinburgh.

The Incorporation of Architects in Scotland was founded in 1916 and obtained a Royal Charter on 6th May 1922.

The Incorporation maintains local divisions of its members known as Chapters, to each of which a definite portion of the whole territorial area of Scotland is assigned as its sphere of influence and action.

The Incorporation consists of three classes of Active Members: Fellows, Associates, and Students; and two classes of Honorary Members: Honorary Fellows, and Honorary Corresponding Fellows. *Fellows* must be over thirty years of age, engaged as principals for at least five successive years, or engaged in professional education under an educational body in Scotland, recognised as such by the Council. *Associates* must be over twenty-one years of age and resident in Scotland, who, having completed a term of pupilage or the equivalent in the Schools, are engaged in the practice of Architecture as principals, or employed as assistants in an architect's office recognised as such by the Council, or are engaged in professional study or education. *Students* must be over sixteen years of age and resident in Scotland who are pupils in an architect's office or are engaged in the study of Architecture in the Schools or in such other way as the Council recognise as equivalent; candidates for the studentship are recommended to have the Leaving Certificate of the Scottish Education Department or its equivalent. Associates who have been engaged as principals for five years and who are otherwise eligible for Fellowship must apply for admission as Fellows, failing which the Council may consider they have resigned; in like manner Students on becoming eligible must apply for admission as Associates, or have their names removed from the list. Membership of the Incorporation is conditional on concurrent membership of the Chapter within whose territory the member's office is situated. Each Chapter has its territorial designation as a Chapter of the Incorporation, but it may with the consent of the Council of the Incorporation, retain a proper name or title other than its designation as a Chapter of the Incorporation. The Chapters number six, viz.:—

ABERDEEN SOCIETY OF ARCHITECTS.
DUNDEE INSTITUTE OF ARCHITECTS.
EDINBURGH ARCHITECTURAL ASSOCIATION.
GLASGOW INSTITUTE OF ARCHITECTS.
INVERNESS ARCHITECTURAL ASSOCIATION.
STIRLING SOCIETY OF ARCHITECTS.

Each Chapter has its own President and Council, who manage the affairs of the Chapter and prepare an Annual Report for submission to the Annual Convention of the Incorporation. Each Chapter Council appoints from its own Chapter representatives to serve on the Council of the Incorporation. The Presidents of the several Chapters are Vice-Presidents of the Incorporation. Each Chapter may frame Rules and Regulations for its own government subject to the approval of the Council of the Incorporation. The Annual Convention of all the Members is held in or about the month of June at the place fixed at the preceding Annual Meeting. At the Annual Convention the New President is elected and installed.

OVERSEAS ALLIED SOCIETIES. AFRICA.

THE INSTITUTE OF SOUTH AFRICAN ARCHITECTS.

(Year of Alliance 1928.)

The Architects' and Quantity Surveyors' (Private) Act No. 18 of 1927 provides for the establishment and incorporation of "The Institute of South African Architects," which comprises four Provincial Institutes of Architects and a Chapter of Quantity Surveyors.

At the time of the passing of the Act, 18th June 1927, there existed in the Union of South Africa the following Institutions:—

In the Transvaal, "The Association of Transvaal Architects," incorporated under the Architects' (Private) Act No. 39, of 1909, of the then Colony of the Transvaal;

In Natal, "The Natal Institute of Architects," incorporated under Act No. 10, of 1902, of the then Colony of Natal;

In the Cape of Good Hope, the Cape Institute of Architects and the Port Elizabeth Society of Architects;

In the Orange Free State, an Institute of Architects;

In South Africa, "The South African Institute of Quantity Surveyors," incorporated under Ordinance No. 56, of 1903, of the Transvaal.

These respective enactments were duly repealed under the new Act of 1927, wherein is incorporated "The Institute of South African Architects," within which is the Chapter of South African Quantity Surveyors.

From the professional point of view the most important provision of the Act of 1927 is the protection of the titles of "Architect" and "Quantity Surveyor." These titles can only be used by registered Architects and enrolled Quantity Surveyors. Any unregistered person using either title is liable, on conviction, to a fine not exceeding one hundred pounds for each offence.

The Register (of Architects) and the Roll (of Quantity Surveyors) consist of those members of both professions who at the time of the passing of the Act were either *bona fide* performing the work of an Architect or Quantity Surveyor, respectively, or who were assistants in the respective professions, who duly made application for membership of the Institute and whose applications were approved by the Inaugural Board appointed by the Minister under the Act; and those who have since qualified for admission.

After the expiration of the time prescribed for such inaugural registration or enrolment, the conditions materially altered inasmuch as no person can now be registered or enrolled unless he passes certain examinations, prescribed by the "examining authority" (i.e. the Universities of Cape Town, the Witwatersrand, and Pretoria) appointed by the Hon. the Minister of Education, and possesses certain training, or was, prior to the passing of the Act, a member of a Society or Institute recognised by the Minister as "of equivalent standing."

In the Act provision is made for the framing of Regulations governing the administration of the Act, which Regulations duly framed by the Inaugural Board, and gazetted, became law on the 14th April 1928. These Regulations deal with the management, powers and duties of the Institute, the Provincial Institutes and the Chapter; with the classes and designations of Members and the defining of their rights and liabilities;

with the procedure, duties and powers of the Central Council, of the Provincial Committees and the Board of the Chapter; with what in an architect or quantity surveyor shall constitute "unprofessional conduct"; with the scale of professional fees, etc. Provision is made also in the Regulations for the direction and co-ordination by the Central Council of architectural and quantity surveying education in South Africa.

THE CENTRAL COUNCIL.

The Central Council was created on 14th April 1928, being in the first instance a Council nominated by the Inaugural Board, the Inaugural Board remaining operative until the elected Central Council came into being.

The Central Council is a body representative of both professions in South Africa, elected by the four Provincial Institutes and the Chapter in proportion to their membership. The present Central Council is composed of twelve members, ten being elected by the Provincial Institutes and the Chapter (Transvaal, 4; Cape, 2; Natal, 1; Orange Free State, 1; the Chapter, 2), and two being Government nominees in the persons of the Chief Government Architect and the Chief Government Quantity Surveyor.

In the main the work of the Central Council, as the executive body of the Institute, pertains to the administration of the Act in relation to all architectural and quantity surveying matters of principle throughout the four Provinces of the Union; while each Provincial Institute controls the domestic affairs of its members in its Province, and the Chapter deals with the domestic affairs of quantity surveyors. The work formerly done by the Inaugural Board *re* registration and enrolment, the framing and amending of Regulations, the issuing of certificates, etc., is now performed by the Central Council.

(Year of Alliance 1907.)

Secretary.

Major P. Milne Duncan, O.B.E., F.S.A.A., Markham's Buildings, Hout Street, Cape Town.

The Cape Institute of Architects, founded in 1899, and admitted to alliance with the Royal Institute of British Architects in 1907, was incorporated under the Architects and Quantity Surveyors (Private) Act, 1927, and became known as the Cape Provincial Institute, one of the Provincial Institutes forming the Institute of South African Architects established under the same Act.

The Act provides for three classes of members, viz.:—Practising Members, Salaried Members and Retired Members.

The Act restricts the use of the titles of Architect and Quantity Surveyor to persons who are members of the Institute. Admission to membership (subsequent to Inaugural Registration) is subject to the following conditions: (1) Applicant must not be less than 21 years of age; (2) he must have passed a qualifying examination approved by the Minister, or (3) he must have been a member of one of the Institutes incorporated under the Act or of any other Society of Architects which the Minister may declare by proclamation to be of equal standing.

THE ORANGE FREE STATE PROVINCIAL INSTITUTE.

Hon. Secretary.

Fredk. W. Masey [F.], 16 National Mutual Buildings, Maitland Street, Bloemfontein, O.F.S.

The first movement for the formation of an Architectural Body in the Orange Free State resulted from an invitation issued by Mr. Fredk. W. Masey to Messrs. John Williams, H. G. de la Cornillière, Cyril Dyer, A. Schultz and Mr. G. A. Stewart—the City Engineer—who met at the Bloemfontein Club to discuss matters appertaining to the interests of Architects on 14th March 1913. Matters dealt with included Government Licences, Professional Fees, Quantities, Public Works Departmental Work, Town Council Bye-laws.

After the close of the Great War other meetings were held in November and December 1920; June, August, September and October 1921, when a voluntary Association of Licensed Practising Architects of Bloemfontein was changed to the Orange Free State Institute of Architects.

Messrs. Fitt and Masey were appointed Delegates from the Orange Free State to a Congress of Architects from all four Provinces in September 1921, when united action was started for the South African Architects Parliamentary Bill.

The Institute since the passing of the Bill by the South African Union Parliament, changed its title to that which it now possesses.

THE TRANSVAAL PROVINCIAL INSTITUTE. (INCORPORATED).

(Year of Alliance 1923.)

67 Exploration Building, Commissioner Street, Johannesburg.

Secretary.

A. S. Pearse, P.O. Box 2266, Johannesburg.

The Association of Transvaal Architects was incorporated by Private Act No. 39 of the Transvaal, assented to on the 7th July 1909.

The Transvaal Provincial Institute replaces the old Association of Transvaal Architects, now incorporated under the new Institute of South African Architects.

The management of the affairs of the Provincial Institute is conducted by a Committee consisting of a President, two Vice-Presidents and nine other members (of whom four may be in salaried employment).

They are elected annually at the General Meeting of the Institute held in March in each year. Members of the Committee retire annually, but are eligible for re-election.

Special Meetings of members are held as circumstances require or upon the signed requisition of twelve members.

The clerical work of the Provincial Institute is carried out by a permanent Secretary. The work of the Committee is assisted by several advisory committees, viz.: Finance, Practice, Journal, Building Bye-laws, Art and Education, Board of Examiners, etc., whilst it has representatives on several outside Associations in which its members are directly interested.

The Committee, through its Art and Education Committee, has been instrumental in establishing the South African Academy, an annual exhibition of paintings, architectural studies, modelling, sculpture and craft work. By the initiative of the old Association of Transvaal Architects, coupled with monetary contributions from a considerable section of the members, the first Chair of Architecture in South Africa was established at the University of the Witwatersrand, Johannesburg.

The Transvaal Provincial Institute publishes its own monthly journal, "The South African Architectural Record," which is also the official journal of the Natal and Orange Free State Provincial Institutes and the Chapter of South African Quantity Surveyors.

The Association of Transvaal Architects entered into affiliation with the Royal Institute of British Architects in the year 1923.

The objects of the Institute include the general advancement of Civil Architecture, promoting and facilitating the acquirement of knowledge connected with the various arts and sciences connected therewith ; the regulation, guidance and protection of those engaged in the practice of Architecture, and for Educational and benevolent purposes.

This Institute promoted the Registration of Architects practising in Southern Rhodesia, and the Architect's (Private) Act of 1929 was promulgated and received the consent of His Excellency the Governor, July 5th, 1929.

The Act established The Institute of Southern Rhodesian Architects as a corporate body with perpetual succession and defined the rights, powers, privileges and duties of Members thereof, and sets out the Qualifications for Registration of Architects practising in Southern Rhodesia prior to the passing of the Act ; and the experience and qualifications necessary for subsequent Registration which includes the passing of certain examinations,

AUSTRALASIA.

THE ROYAL AUSTRALIAN INSTITUTE OF ARCHITECTS.

(Year of Alliance 1922.)

4A Bligh Street, Sydney, N.S.W.

On April 15th 1915, the Institutes of Architects in Australia founded the Federal Council of the Australian Institutes of Architects. This body was allied with the R.I.B.A. in 1922. On September 6th 1929, the Federal Council gave way to the Australian Institute of Architects, and this in turn gave way to The Royal Australian Institute of Architects, which was incorporated on August 18th 1930.

The Royal Australian Institute is supplementary to the State Institutes where such continue to exist or to function; this position obtains in Victoria, South Australia and Tasmania: in New South Wales and Queensland the State Institutes have voluntarily suspended operations and Organised Chapters of the Royal Australian Institute have taken their place.

In those States where State Institutes still function, duplication of authority is obviated by action taken under an agreement (the Agreement of 1930) whereby these State Institutes ceded to the Royal Australian Institute sole authority in respect of (1) Promotion of Commonwealth Acts of Parliament; (2) Examinations; (3) Granting of Diplomas and the right to use initials; (4) Ethics; (5) Scale of Fees; (6) Competition Code; (7) Conditions of Contract; (8) Contracts between Architect and Client; (9) Quantities.

The Organised Chapters or State Institutes (as the case may be) act as the representatives of, and executive authorities for, the Royal Australian Institute within their particular territories.

The Royal Institute of the Architects of Western Australia is not a party to the Agreement of 1930, nor allied with the Royal Australian Institute.

The Royal Victorian Institute of Architects was founded in 1871, and incorporated under the Statutes of the Parliament of Victoria, Nos. 109 and 764, in 1890. Its objects are the advancement, protection, and elevation of Architecture as an art, and the cultivation of friendly intercourse between members. The Institute consists of Life Fellows, Fellows, Associates, and Honorary Fellows. *Life Fellows* are architects elected by the Institute for eminent services rendered to the Institute. *Fellows* are architects who have attained the age of thirty years, and have served articles for at least three years to a recognised practitioner or have satisfied the Council as to their qualifications and have been engaged as principals for at least seven years in the practice of Architecture and have erected buildings of sufficient importance in the judgment of the Council. The Institute has power to declare that every person desiring to be admitted as a Fellow shall be required to have passed such examination or examinations as may be directed by the Institute. In special cases the Council have power to dispense with such Examination. *Honorary Fellows* are gentlemen not practising as architects in Victoria, and distinguished by scientific, artistic, or literary attainments. The Institute has power to hold examinations at such times and places within the State of Victoria, or elsewhere, and in such a manner as the Council may determine. CANADA.

THE ROYAL ARCHITECTURAL INSTITUTE OF CANADA.

(Year of Alliance 1909.)

627 Dorchester Street West, Montreal.

Hon. Secretary.

Alcide Chaussé, J.P., F.R.A.I.C. [F.], 706 St. Gabriel Street, Montreal.

Secretary.

I. Markus, 74 King Street East, Toronto 2.

The Royal Architectural Institute of Canada was founded as the Institute of Architects of Canada, 19th August 1907 ; was incorporated by Special Act of the Dominion Parliament, 16th June 1908 (7 & 8 Edward VII, Chap. 82), under the corporate name of "The Architectural Institute of Canada," and was granted Royal permission to adopt the prefix "Royal" to its corporate name, 2nd June 1909.

The Charter of the Institute was amended by a Special Act of Parliament, sanctioned 1st April 1912, and on the 10th June 1929. The Council is composed of the delegates of the various provincial associations of architects in Canada. This completes the Federation of all the Canadian architectural bodies, which has been the aim of the founders of the Institute since the date of its formation on the 19th August 1907.

The Federated Societies consist of the Alberta Association of Architects, the Manitoba Association of Architects, the Ontario Association of Architects, the Province of Quebec Association of Architects, the Saskatchewan Association of Architects, the Architectural Institute of British Columbia, the Nova Scotia Association of Architects, and the Architects' Association of New Brunswick.

The objects of the Royal Institute, as set forth in its Charter, are "to facilitate the acquirement and interchange of professional knowledge among its members, and more particularly to promote the acquisition of the species of knowledge which has special reference to the profession of architecture, and further to encourage investigation in connection with all branches and departments of knowledge connected with that profession."

There are three classes of members—viz.: (1) *Honorary Fellows*, who are persons eminent in Architecture or kindred sciences; (2) *Fellows* who are nominated by the Council; (3) *Members*, who are members of Federated Societies. A Code of Ethics, Schedule of Usual and Proper Minimum Charges, and Regulations for Architectural Competitions, were adopted in the General Annual Assembly on the 21st February 1931, held in Montebello (Lucerne-in-Quebec), Quebec. Revised Bye-laws were adopted on the 28th December 1929, at Montreal, Quebec. The General Annual Meeting is held in February.

THE INDIAN INSTITUTE OF ARCHITECTS.

(Year of Alliance 1925.)

[Province : India. Centre : Bombay.]

Joint Hon. Secretaries.

C. M. Master, M.A. [F.], 41 Hamam Street, Fort, Bombay.
S. C. Pastakia [A.], Kolah House, 685 Tardeo Road, Bombay.

The Indian Institute of Architects was founded as the Architectural Students Association in 1917; its constitution and bye-laws were thoroughly revised and its name altered in 1922 to the Bombay Architectural Association. In 1929 the constitution was again revised and the name altered to the Indian Institute of Architects. The objects of the Association as set out in its constitution are :—

To encourage the study of Architecture, to elevate the standard of architectural practice and, by mutual support, to promote the interests of Architects throughout India.

There are three classes of Members, viz. : (1) *Fellows* : Any person shall be eligible for election as a Fellow who is a Fellow of the Royal Institute of British Architects. A Fellow shall be at liberty to use the abbreviation "F.I.I.A." after his name, but not after the name of his firm; (2) *Associates* : Any person engaged in the profession of an Architect either as a Principal or Assistant shall be eligible for election as an Associate who is an Associate or Licentiate of the Royal Institute of British Architects, or who is at the time of the formation of the Indian Institute of Architects an ordinary Member of the Bombay Architectural Association or who holds the Diploma in Architecture granted by the Government of Bombay, or who has passed the Advanced Examination of the School of Architecture, Bombay, between the years 1909 and 1922. An Associate shall be at liberty to use the abbreviation "A.I.I.A." after his name but not after the name of his firm; (3) *Subscribers* : Any person shall be eligible for election as a Subscriber who was at the time of adoption of this constitution a Member of the Bombay Architectural Association or any person who by reason of his artistic, scientific or literary attainments may appear to the Council as likely to render assistance in promoting the objects of the Institute. A Subscriber shall neither use the full designation of the Institute nor any abbreviation thereof.

The activities of the Institute include Monthly Meetings from June to April, visits to works or places of architectural interest, the award of an Institute Studentship each year, and the publication of a Quarterly Journal.

The Institute also owns and conducts a Library, which is known as The Sohrab F. Bharoocha Architectural Library, so named after the name of the late Mr. Sohrab F. Bharoocha, one of the past Presidents of the former Bombay Architectural Association.

Several Committees are also engaged in deliberations, and report to the Council from time to time, viz. :—A Practice Committee, a Library Committee, a Journal Committee, a Finance Committee, and a Salaried Members Committee.

The Indian Institute is also allowed to hold the R.I.B.A. Final and Special Final Examinations in India. For this purpose a Board of Examiners in India is appointed annually (three representatives of the R.I.B.A. and three representatives of the I.I.A.).

STRAITS SETTLEMENTS.

THE INSTITUTE OF ARCHITECTS OF MALAYA.

[INCORPORATED.] (*Year of Alliance 1923.*)

[*T.A. Architrave, Singapore.*]

Secretary.

A. Cannell, 12D Union Building, Singapore.

The Institute of Architects of Malaya was founded as the Singapore Society of Architects in 1923, was admitted to alliance with the Royal Institute in the same year; and was incorporated by special licence of the Governor-in-Council of the Straits Settlements on the 26th April 1928.

In 1930 owing to the increase of membership throughout the peninsula and the formation of a Local Branch of the Society in the Federated Malay States it became necessary to re-incorporate, and to change the name of the Society to the Institute of Architects of Malaya which re-incorporation and change of name was approved by the Governor-in-Council of the Straits Settlements on the 2nd May 1931.

The objects of the Society are: The advancement of Architecture, the promotion of Architectural Education, the facilitation of friendly intercourse between local Architects, and the promotion of the profession generally.

In 1926 the Society obtained the assent of the Straits Settlements Government to the passing of The Architects Ordinance (1926), which came into force on the 1st of January 1927. The Ordinance was passed for the registration of persons practising, and for the regulation of the profession of Architecture in Singapore and Penang, to provide a qualification for

admission to the Register of Architects, to restrict the use of the title of Architect to qualified persons, and to provide a penalty for wrongful use of the title.

(ii) If the contract and/or order does not exceed £2,000 the percentage is 10 per cent in the case of works costing £100 graduated to

6 per cent in the case of works costing £2,000 as the special character of such works may render appropriate.

The measurement and valuation of variations and the preparation of statements of account at the conclusion of the works are separate services for which the Scale set out in I (b) provides.

I. *Lump Sum Contracts : Architectural Work.*

When acting in the capacity of a Quantity Surveyor in connection with :—

(a) Taking out and preparing Bills of Quantities :—

(i) *Basic Scale.*

In calculating the amount on which fees are payable, the total of the Credit Bill (if any) and the total of any Alternative Bills are to be added, but any Omission Bill forming part of an Alternative Bill is not to be included unless actual measurement is necessary to arrive at the omission.

The cost of lithographing or printing the Bills of Quantities is not included in the above Scale, but is to be charged in addition at the net amount payable to the lithographer or printer.

When the measurement proceeds by stages involving the preparation of periodical bills, then the percentage charge shall be increased by $\frac{1}{2}$ per cent.

NOTE.—In cases where any of the materials used in construction are supplied by the building owner, the percentage charge to be made upon the estimated or actual value thereof.

III. *Prime Cost Contracts.*

SCALE OF ARCHITECTS' CHARGES FOR LOCAL AUTHORITIES' AND PUBLIC UTILITY SOCIETIES' HOUSING WORK.

Approved by the Council of the Royal Institute on 17th July, 1933.

(To be obtained at the office of the Institute, price threepence.)

Having in view the desirability of employing qualified architects for the design of houses of the smaller types likely to be erected by Local Authorities and Public Utility Societies, and in order to assist in the solution of the Housing problem, the charges for this work have been revised in accordance with the following scale.

In municipal housing, it may, in some cases, be desired that the Council Surveyor shall carry out part of the work, and the scale has been arranged so that if desired the architect's services can be limited, but it is preferable that the architect should be employed to carry the scheme through all its stages in order that it may be satisfactorily interpreted, and it is believed that the new scale will be found to be so reasonable that this method will be widely followed.

The scale is exclusive of reasonable travelling and out-of-pocket expenses, and printers' charges for additional copies of drawings and documents.

ASSESSORS IN COMPETITIONS.

Members of the Institute who have been requested to act as Assessors subsequent to the conditions of the Competition having been drawn, should obtain a copy of the conditions and consider their conformity with the Regulations issued by the Royal Institute, and should also notify the Secretary of the Institute that they have been asked to act.

AN EXPLANATORY MEMORANDUM ON THE SYSTEM OF ARCHITECTURAL COMPETITIONS.

The system of architectural competitions has been recognised for many years as the best method of obtaining designs for, and architects to supervise the erection of, all buildings, particularly where the expenditure of public funds is involved. For a modest expenditure which represents a very small proportion of the cost of the building the promoters can obtain designs from competent architects in all parts of the country. If the competition is properly organised in accordance with established practice there can be no question but that the building promoters will benefit from the concentrated study of a large number of architects, all of whom will submit differing solutions of the problem.

During the past century most of our important buildings were erected as the result of architectural competitions, and since the Great War over 320 competitions have been held under the auspices of the Royal Institute of British Architects, including 70 town halls, law courts, fire stations or art galleries, 50 schools and other buildings of an educational character, 30 housing and town planning schemes, 30 hospitals and between 30 and 40 war memorials, 10 churches or Sunday schools, and over 100 for buildings of a miscellaneous character.

During many years' experience in the conduct of architectural competitions the Royal Institute of British Architects, representing the great majority of the practising architects in the country, has built up a series of Regulations governing the Promotion and Conduct of Architectural Competitions which are recognised as most satisfactory and equitable to all concerned, and have been used as a model in other countries. Whilst modifications in these regulations may be made in certain instances, particular clauses, such as that providing for the appointment of fully qualified professional assessors, and that stipulating that no promoter nor assessor nor employee of either shall compete or assist a competitor or act as architect for the work, are regarded as essential.

Promoters should have no hesitation in agreeing to accept the award of an assessor as being that of one who has heard and assimilated their views and requirements, and who, through his technical qualifications, is able to act judiciously in selecting the best of the designs anonymously submitted. Moreover, promoters have the right to ask that reasonable modifications shall be made in the winning design before the building is carried out should they desire to do so.

The Royal Institute of British Architects is always ready to nominate assessors and to offer suggestions or guidance in the conduct of competitions. In the interests of architecture and of the public those concerned in prospective building schemes are strongly recommended to avail themselves of the competition system.

Issued by the R.I.B.A. Council, 15/10/34.

REGULATIONS GOVERNING THE PROMOTION & CONDUCT OF ARCHITECTURAL COMPETITIONS

AS APPROVED BY THE R.I.B.A. AND ITS ALLIED SOCIETIES.

[Re-issue after revision : December 1910, February 1921, March 1924, June 1926, December 1928, October 1931, October 1933, and January 1934.]

(To be obtained free of charge at the office of the Royal Institute.)

It is assumed that the object of the Promoters is to obtain the best design for the purpose in view. Where the Promoters desire to achieve this end by means of a Competition experience shows that this object may best be secured by conducting all Competitions upon the lines laid down in the following Regulations, which have been framed with a view to securing the best results to the Promoters with scrupulous fairness to the competitors.

Members of the Royal Institute of British Architects and Members of its Allied Societies do not compete excepting under conditions based on these Regulations.

The Conditions of a Competition shall contain the following Regulations (A) to (F) as essential :—

(A) The nomination for every Competition of an Assessor or Assessors who shall be Architects of acknowledged standing to whom the whole of the designs shall be submitted.

(B) Each design shall be accompanied by a declaration, signed by the competitor, or joint competitors, stating that the design is his or their own personal work, and that the drawings have been prepared under his or their own supervision. A successful competitor must be prepared to satisfy the Assessor that he is the *bona-fide* author of the design he has submitted.

(C) No Promoter of a Competition, and no Assessor engaged upon it, nor any partner, associate or employee of either shall compete OR ASSIST A COMPETITOR, or act as Architect, or joint Architect, for the proposed work.

This regulation shall also preclude the regular staff and present students of a School of Architecture from taking part in a Competition in which a member of the regular teaching staff is acting as sole Assessor, but not in cases where a Jury of three or more Assessors is concerned of whom only one is a member of the regular teaching staff.

The Assessor must not act as Consulting Architect, unless he has been appointed as such before the inception of the Competition, nor in any other professional capacity in any matter connected with the work which has been the subject of the Competition, provided always that he may act as Arbitrator in any dispute between the Promoters and the selected Architect.

If under the special conditions referred to above the Assessor is acting as Consulting Architect, it should be clearly stated in the published conditions of the Competition.

(D) The premiums shall be paid in accordance with the Assessor's award, and the author of the design placed first by the Assessor shall be employed to carry out the work, unless the Assessor shall be satisfied that there is some valid objection to such employment, in which case the author of the design placed next in order of merit shall be employed, subject to a similar condition. The award of the Assessor shall not be varied for any other reason.

(E) If no instructions are given to the author of the design selected by the Assessor to proceed within twelve months from the date of the award, then he shall receive payment for his services in connection with the preparation of the Competition drawings of a sum equal to $1\frac{1}{2}$ per cent on the amount of the estimated cost stated in the conditions up to £50,000, but if the estimated cost of the work exceeds £50,000 he shall be paid a sum equal to $1\frac{1}{2}$ per cent upon the first £50,000 plus $\frac{1}{2}$ per cent upon any sum in excess of that amount. The first premium shall be deducted from the sum so paid. If the work is subsequently proceeded with, this sum shall form part of his ultimate commission.

If within twelve months of the award, the Promoters shall decide to proceed with part of the work only, the author of the selected design

shall be paid, including the premium and in addition to the scale fees on the work which is being carried out, a sum equal to $1\frac{1}{2}$ per cent on the difference between the cost of the work carried out and his estimate of cost up to £50,000, and if the total estimate exceeds £50,000, then a further $\frac{1}{2}$ per cent on any sum in excess of this amount, which sum shall also merge into the commission when the remainder of the work is subsequently executed.

(F) The selected Architect having been appointed to carry out the work shall be paid in accordance with the Schedule of Charges sanctioned and published by the Royal Institute of British Architects, and the premium already paid shall be deemed to be a payment on account.

1. The Promoters of an intended Competition should, AS THEIR FIRST STEP, appoint one or more professional Assessors, Architects of acknowledged standing, whose appointment should be published in the original advertisements and instructions. The selection of an Assessor or of two or more Assessors to act as a Jury should be made with the greatest possible care, as the successful result of the Competition will depend very largely upon their experience and ability. The name or names of the Assessor or Assessors should always appear in the conditions governing a Competition or in any advertisement or other announcement relating thereto. The Promoters may, if thought desirable, appoint a representative to confer with the Assessor or Assessors during the progress of the Competition.

The usual R.I.B.A. Scale of Charges for Assessing Competitions is the sum of Fifty Guineas, plus one-fifth per cent upon the estimated cost of the proposed building.

The foregoing Scale is exclusive of travelling and other out-of-pocket expenses, which are to be charged in addition.

In the event of more than ONE ASSESSOR being appointed, the remuneration shall be decided by mutual arrangement between the Assessors and the Promoters.

The President of the Royal Institute of British Architects is always prepared to act as honorary adviser to Promoters in their appointment of Assessors.

If an Architect is officially approached by the Promoters for advice as to the holding of a Competition with a view to his acting as Assessor, and eventually it is decided not to hold a Competition, but to appoint an Architect to carry out the work, the Architect originally approached in an advisory capacity is precluded from acting as Architect for the work in question.

2. The duties of Assessors are as follows :—

(a) To confer with and advise the Promoters on their requirements and on the questions of cost and premiums to be offered.

(b) To draw up instructions for the guidance of competitors and for the conduct of the Competition, incorporating the whole of the clauses of these Regulations which are applicable to the particular Competition.

Note.—It is essential in drawing up the Instructions to state definitely which of the conditions must be strictly adhered to, under penalty of disqualification from the Competition, and which

of them are optional. Binding conditions should be reduced to a minimum. Instructions to competitors should as far as possible take the form of suggestions, which both they and the Assessor may follow as they deem fit.

(c) To answer queries raised by competitors within a limited time during the preparation of the designs, such answers to be sent to all competitors.

(d) To examine all the designs submitted by competitors and to determine whether they conform to the Conditions and to exclude any which do not.

(e) To report to the Promoters on the designs not so excluded and to award the premiums in strict accordance with the Conditions.

(f) To inform the Promoters if necessary that modifications may be made in the winning design by the successful Architect, if so desired by the Promoters.

3. Competitions may be conducted in one of the following ways:—

(a) By advertisement, inviting Architects willing to compete for the intended work to send in designs. **FOR COMPETITIONS FOR PUBLIC WORKS THIS METHOD IS RECOMMENDED.**

(b) By advertisement, inviting Architects willing to compete for the intended work to send in their names by a given day, with such other information as they may think likely to advance their claims to be admitted to the Competition. From these names the Promoters, with the advice of the Assessor, shall select a limited number to compete, and each competitor thus selected shall receive a specified sum for the preparation of his design.

(c) By personal invitation to a limited number of selected Architects to join in a competition for the intended work. Each competitor shall receive a specified sum for the preparation of his design.

Note.—Where a deposit is required for supplying the Instructions it shall be returned on the receipt of a *bona-fide* design, or if the applicant declines to compete and returns the said Instructions within four weeks of the date for submitting designs.

4. The number, scale, and method of finishing of the required drawings shall be distinctly set forth. The drawings shall not be more in number or to a larger scale than necessary clearly to explain the design, and such drawings shall be uniform in size, number, mode of colouring and mounting. As a general rule a scale of 16 feet to 1 inch will be found sufficient for plans, sections, and elevations, or, in the case of very large buildings, a smaller scale might suffice.

Unless the Assessor advises that perspective drawings are desirable, they shall not be admitted.

5. No design shall bear any motto or distinguishing mark; but all designs shall be numbered by the Promoters in order of receipt.

6. A design shall be excluded from a Competition—

(a) If sent in after the period named (accidents in transit excepted);

- (b) If it does not give substantially the accommodation asked for ;
 - (c) If it exceeds the limits of site as shown on the plan issued by the Promoters, the figured dimensions on which shall be adhered to ;
 - (d) If the Assessor shall determine that its probable cost will exceed by 10 per cent the outlay stated in the Instructions ;
 - (e) If any of the Conditions or Instructions other than those of suggestive character are disregarded ;
 - (f) If a competitor shall disclose his identity or attempt to influence the decision.
7. All designs and reports submitted in a Competition, except any excluded under Clause 6, together with a copy of the Assessor's Award, should be publicly exhibited for at least six days. Due notice shall be given to all competitors of the date and place of such exhibition. It is desirable that competitors should be furnished with a copy of the Assessor's Award.
8. All drawings submitted in a Competition, except those of the design selected to be carried out, shall be returned carriage paid to the competitors within fourteen days of the closing of the Exhibition.
9. The Conditions of a Competition issued by a Corporate Body should have the Common Seal of that Body affixed thereto.
10. In the case of limited or private competitions where the Royal Institute are satisfied that special circumstances may exist, modification of these regulations may be approved by the Royal Institute.
11. Provided always that the Council of the Royal Institute or the President shall be entitled to sanction an exception to the Regulations where, in their or his view, the interests of the Client and the best interests of the profession clearly justify this course.

REGULATIONS FOR INTERNATIONAL ARCHITECTURAL COMPETITIONS.

*Settled at Paris, November 1908, by the International Competitions Commission appointed by the VIIth International Congress of Architects (London, 1906).**

1. International Competitions should be reserved for exceptional occasions of a really international character.
2. International Competitions may be either open to all architects without invitation, or limited and by invitation.
Limited and invited Competitions may consist of a single stage.
Competitions open to all should be held preferably in two stages.
3. The "Conditions" of International Competitions are to be identical for all competitors.
No drawing, model or document shall be taken into consideration except those specified in the Conditions, nor shall any other drawing, model or document be exhibited.
4. The Instructions to Competitors should state definitely the Conditions of the Competition, and matters considered desirable should not be left to the option of Competitors.

* See report of the British delegate, Sir John W. Simpson, JOURNAL R.I.B.A., 9th January 1909.

5. In limited and invited Competitions, the Conditions should be fully detailed and require the scheme to be fully developed.

In Competitions open to all the Conditions should express the technical requirements in general terms and limit the number and scale of the drawings to the minimum necessary for the jury to understand the design.

The Conditions should require designs to be submitted anonymously under the motto in the first stage, and to be signed by the Authors in the second stage.

Competitors are forbidden under penalty of exclusion to act in any way which would tend to disclose their identity.

6. In double Competitions the Conditions in the first stage should be as those for Competitions open to all, and in the second stage as those for limited and invited Competitions.

Designs selected in the first stage only can be admitted to the second stage.

7. The Conditions of a Competition should be published and placed at the disposal of the Competitors as nearly as possible on the same date in all countries.

Any design not dispatched by the date of closing the Competition shall be excluded; the Carrier's receipt shall be accepted as proof.

8. The Conditions should be prepared in consultation with experienced Architects.

They shall be published in the French language.

9. The jury is to be nominated by the Promoters of the Competition; it is recommended that Promoters, before nominating the foreign members, should place themselves in communication with the Comité Permanent.

The jury of an International Competition shall be composed of Architects, each of different nationality, one of whom shall belong to the country which institutes the Competition. A legal authority, nominated by the Administration promoting the Competition, shall preside in order to ensure regular procedure, but shall have no vote.

The members of the jury, by accepting nomination, shall be held to have declared themselves to have no material interest, either directly or indirectly, in the result of the Competition.

10. It is desirable in International Competitions, and especially in the preliminary stages, that the limit of cost shall be only approximately fixed in order to leave some liberty to the artistic conception of Competitors.

When the sum available for carrying out the work is specified, the Conditions of Competition should give the information required for preparing approximate estimates on a uniform basis.

11. The total value of the premiums to be awarded shall be $2\frac{1}{2}$ per cent on the cost for works not exceeding £100,000 in value, 2 per cent on those not exceeding £200,000, and $1\frac{1}{2}$ per cent for works beyond that value.

The principle must be enforced that the carrying out of the work be entrusted to the Architect placed first, subject to the conditions in force in the country promoting the Competition.

The amount of the prize shall not be deducted from the amount of the fees payable.

In the event of the person or Corporation promoting the Competition

wishing to reserve the right to pass over the Architect placed first, the Conditions of Competition must state the terms of compensation.

Should the work not be executed, the same compensation shall be due.

In all cases the authors of designs submitted retain the artistic copyright in their design, and in the building which is a reproduction thereof.

12. In single-stage Competitions all the designs shall be exhibited in a suitable place and for a sufficient time to enable all Competitors to visit the Exhibition, which should be advertised beforehand in the professional papers.

In double Competitions there shall be no Exhibition after the first award; all the drawings shall be placed under seal and exhibited subsequently, together with the designs in the final Competition.

The authors of designs selected in the first stage shall have the right to make tracings thereof for use in preparing their final designs.

The full report of the jury, giving their reasons for the award, shall be published before the opening of the Exhibition and communicated to all the parties interested.

GENERAL ADVICE TO PROMOTERS AND OTHERS REGARDING THE CONSERVATION AND REPAIR OF ANCIENT BUILDINGS.

[First issued in 1865, revised and enlarged in 1888, and re-cast in 1926.]

(To be obtained at the Office of the Institute, price One Shilling.)

GENERAL PRINCIPLES.

Few subjects are more generally misunderstood than that relating to the repair or conservation of ancient buildings. Whether clergy or laymen, the promoters of the so-called restoration of old buildings are often more bent upon altering old work or carrying out new works than on preserving what exists. It cannot, therefore, be too strongly insisted that renewal should be avoided, and this even when such a process would be effective from a practical standpoint, for every renewal changes the character of old work. The object should be to preserve carefully an ancient building, be it ecclesiastical or other, by repairs carried out with sympathy and reserve so that it may continue to be an authentic specimen of the ancient art of our country. Every old building has its historical value, and is a physical expression of the craftsmanship of past ages, and it should be remembered that these values are lost when authenticity is destroyed. Above all, no old work should be destroyed, except under the most imperative necessity. The duty, therefore, of all concerned with ancient buildings is conservation, and this embraces every portion of original work.

Ancient buildings, generally, have been altered at various periods. All old work should be preserved to show the history of the fabric. A guard should be kept against the indulgence of individual preference for, or dislike of, particular features or styles, and especially against the theory once commonly held that a building must be purged of all features other than those of a favourite period.

It is upon the broad principles so outlined that the suggestions embodied in this document are based. It is intended that they shall be of use to those

who are concerned with the preservation of old buildings and ancient examples of craftsmanship.

General Remarks.—The following suggestions and remarks have been drawn up with special reference to the repair of churches. The same spirit, however, ought to actuate those who have the care or ownership of ancient civil or military buildings, as from their comparative rarity they may be more valuable as historical monuments even than churches.

Old Materials.—It should not be forgotten that the practice of despoiling old buildings of materials, either for the repair of buildings or for other purposes, has resulted in the destruction of many valuable works. This practice cannot, therefore, be too strongly deprecated and should never be countenanced.

Preliminary Steps to be Taken.—Before any work is decided on a competent architect should be consulted. The architect should be one whose training and qualification are such as fit him to deal with work of conservation. He would make careful record drawings of the building, with measurements, of those parts which are likely to be affected, and photographs, including an indication of the scale, should be taken under his directions.

Deposit of Plans.—In the case of churches these photographs and copies of the drawings should be deposited with the Church Authority, and it is also suggested that they should be placed on the inventory to be seen by the archdeacon at his visitation.

Retention of Furniture, etc.—No clearance of objects such as furniture, old wall linings, pavements, flooring, galleries, pews, box-pews, wall partitions or other work of interest should be carried out except under imperative necessity.

Enquiry for Missing Portions of Old Work.—With a view to their preservation in a proper place, careful enquiry should be made for any portions of church furniture including masonry, old glass, stained or clear, brasses or other old works which may at any time have been removed from the building.

Floor Levels.—Ancient floors should be maintained. Only in cases where it appears certain upon investigation that the level of an existing floor is not the original should a change be considered.

Plastered Surfaces, Internal or External.—All plastered surfaces should be carefully examined with a view to discover any remains of painting upon them, and all ancient paint or whitewash cautiously cleaned, so that no injury may be done to any painting, diapering, powdering or other decoration, if such exist. Where it is proposed to repair the roofs, all cleaning should be deferred until after the plastered surfaces are protected from the weather. Ancient plastered surfaces on walls and ceilings should, wherever possible, be preserved; and this often applies to external plastering, harling or rough cast.

Ancient Glass.—Ancient glass with the original leading and iron framework should be carefully preserved, and never allowed to be taken out of the building save for the purpose of necessary repair, and this only by competent workmen. It is seldom desirable to remove ancient glass from the place it occupies even when small fragments only remain. If new glass has to be put in old windows care should be taken to fit it to the irregularities of the

tracery. Old clear or Crown glass should also be preserved. The possibility of placing in the windows old glass found during the work should be considered.

Stonework of Windows.—There are various ways of repairing the stonework of traceried windows, each of which is useful according to circumstances. The advice of an architect experienced in conservation work is especially necessary in such cases.

Ironwork of Windows.—Ancient ironwork of windows should be preserved, and if it shows signs of splitting the stone it should be carefully removed, have new copper ends welded on and as carefully reinstated.

Treatment of Stonework.—In the repair of walling no scraping or tooling of the surface should be permitted. The fact that masonry is decayed or damaged is not in itself a sufficient reason for re-building or renewal, and no new stonework should be used unless it is the best material to make the building structurally sound and weatherproof. Those parts only which are thus defective should be cut out and carefully renewed, but it does not follow that stone is the best material for the purpose. The same principles apply to walls of other materials.

Walls Out of Plumb.—Walls can usually be repaired without pulling them down. It is seldom necessary to straighten a wall which is not upright.

Old Roofs.—A new roof is rarely necessary where an ancient one exists; even if defective it can almost invariably be repaired. Often the ends of beams or rafters alone are decayed. Such timbers should not for this reason be discarded, but should be repaired by scarfing or otherwise. Where for some reason a new roof is to be put on ancient walls it should be constructed, preferably in English oak, without attempt to reproduce the forms of any past styles. Tie beams or rods should seldom be omitted in these circumstances.

The pitch of a new roof depends on many considerations. It must be left to the judgment of the architect, but indications of the old roof may be a guide.

Roof Coverings.—Old roof coverings—lead, tile, thatch, slate or stone—should be retained, and if repair is necessary new material of like nature should be procured. Worn-out lead should be re-cast.

Monuments, Effigies, etc.—In no case should anything be done to monumental effigies, brasses, figures, heraldic devices, foliage, or other such works, either under cover or in the open beyond carefully cleaning or, when necessary, re-setting. Care should be taken to protect them from injury.

Fonts, etc.—Pulpits, fonts, piscinæ, etc., like other stonework, should on no account be scraped or re-tooled as has been too often the case. If these objects are to be brought into use, repairs for this purpose should be confined to essentials and not be allowed to extend to the renewal of decorative features.

Screens, etc.—Screens, seats and other furniture should not be removed from their original position. In this case, again, repairs should be confined to structural essentials.

Paintings.—Wall or other old paintings should not be touched nor, if covered, should attempt be made to expose them until expert advice has been obtained. Neglect of this precaution has resulted in irreparable damage to much valuable ancient work. For the preservation of wall paintings the first essential is that the wall itself shall be made safe from damp.

Fragmentary Remains.—The specification should contain a clause stipulating that the contractor has no claim upon old materials, excepting any which may be specially exempted. Fragments of sculpture, tiles, glass, metal work, and the like should be preserved in the building, with a record of the place in which they were found.

Contract.—It is nearly always undesirable to enter into a lump sum contract for repair works. It is, however, sometimes convenient to arrange contracts for sections of works of which the nature and precise extent can be determined beforehand. Repair work, because of its nature, must be of a piecemeal or conjectural character, and the danger of a lump sum contract is either that the contractor under-estimates—leading to unsatisfactory work—or he too amply covers himself, which causes a higher expenditure than is actually warranted. The architect will advise as to the best form of contract applicable to each case. A usual form of contract provides that the builder shall render an account of the time and materials, as directed by the architect, at a fixed rate of profit on the net cost of the work.

General Conclusion.—In the principles and methods advocated in this document the Royal Institute has the support of the Society for the Protection of Ancient Buildings, of 20 Buckingham Street, Adelphi, W.C.2. Working in co-operation with that body the Institute is in a favourable position to afford advice to those who may require it on the subject to which this document relates, particularly in those cases where doubt may exist as to the correct procedure to be followed to secure effective protection or preservation of ancient structures or old examples of craftsmanship.

Such enquiries, explaining the special circumstances on which advice is sought, should be addressed to the Secretary of the Royal Institute at No. 66 Portland Place, W.1.

Note.—Some supplementary information or advice, on points of technical detail, is appended to this document.

SUPPLEMENTARY ADVICE ON POINTS OF TECHNICAL DETAIL.

It is assumed that the work of repair will be directed by an architect and that no action of consequence will be taken without his definite instructions.

Excavation.—In making excavations in or about an ancient building, care should be taken to preserve every fragment of wrought stone, tiles or other ancient objects which may be met with. It is necessary to sift the earth in places where small objects are likely to be found.

Old foundations, bases of pillars, ancient tombs, stone coffins, pavements, or other work which appear to be in their original position should not be removed, but carefully exposed to view, in order that proper records of them may be made so that if possible they may be left permanently in their places.

In excavating and laying drains round old buildings projecting footings, however rough, should not be cut off and care should be taken in exposing them. Work which was clearly not intended to be exposed should not be left open to view or to the air. Drains should be so managed as to draw water from the foundations and not towards them.

Scaffolding.—Wherever scaffolding is necessary it should always be erected independent of the walls, and no support should be obtained from the walls themselves. A greater care should be taken to protect features liable to be damaged than is customary in new building work.

Stonework.—If it is necessary to clean off whitewash or paint from internal or other stonework, it should be remembered that the object of so doing is to bring to view the original surface and not to destroy it. The best way of removing the whitewash without in any degree disturbing, much less removing, the ancient surface must therefore be studied. The mode of tooling or working the ancient stone is a subject of interest, and the old tool marks must therefore not be damaged. If indications of ancient colouring be found on the surface of the stone the attention of the architect should be drawn to it before any attempt at exposing the colour is made.

The mode of removing whitewash depends much on the nature of the materials. In each case experiments should be made under direction to ascertain the best mode. It is preferable to leave the whitewash wholly or partially on the stone, rather than to use any tool which would damage the surface of the stone itself; for it is better to leave the old surface of the stone with the whitewash than to risk injuring it.

When in the course of repair traces of ancient string-courses, weatherings, windows, etc., are found, they should not be concealed again without instructions nor yet tooled off. No tool should be used upon the surface of ancient stonework.

Broken or decayed work should never be removed except where it is necessary to do so for the sake of stability, or where leaving it would be a source of danger. On no account should a stone be renewed simply because it has lost its original form; it is better to have broken or half-decayed authentic work than the most perfect reproduction. The cleaning of old work to make it harmonise with the new should be avoided. The old work is better left with its characteristic tone.

Lichen should not be removed from old surfaces except under expert direction.

In repairing walls, great care should be taken of any old mouldings or other wrought stones found embedded in them, and note taken of where they were found, for the fragments have usually been stowed away near to their original place. If windows or other features should be found, they should not be disturbed until they have been seen by the architect. Encaustic tiling or other ancient paving should be preserved in the places where they are found. Ancient monumental remains should nearly always be kept in their old position.

Carving.—The same principles as are laid down for stonework apply to carving. The re-dressing or restoration of old carving should never be attempted.

Plaster.—If plastering is to be removed it should first be examined for old painting by carefully removing the whitewash here and there, and if it be found to retain old painting nothing further should be done until the attention of the architect has been called to it.

Ancient plastering, even when defective, should not be removed, but only repaired where necessary.

New plastering on old walls should be thin, and carefully tailed off to meet the stone dressing as in ancient work.

Woodwork.—An ancient roof, or other piece of timber work, should not be condemned simply because it is defective. An ancient roof carefully preserved by splicing and other means is infinitely more valuable than a copy of the same in new timber; and even very serious defects can be

repaired if proper methods are employed. By failure to realise this possibility comparatively trifling defects have in the past been made the excuses for destroying some of the finest ancient roofs.

An old roof should never be entirely taken off for purposes of repair, but should be dealt with in its place, bay by bay, and should be kept dry by tarpaulin or other means during the operations. Exposure to wet is very harmful to old timber.

Old timber should not be coated with oil, varnish or stain.

All remains of coloured decoration on old woodwork should be preserved untouched with the greatest care.

Ancient seating should be preserved in its proper place, and any necessary repairs should be carried out on the spot if possible. Every remnant of old woodwork, of whatever description, should be carefully preserved and where possible kept in its place.

Leadwork.—When ancient lead on roofs is to be repaired or relaid, care should be taken to preserve any inscriptions or ornamentations which have been cast on to the old lead. When old lead has to be relaid, the old lead should be re-cast—on the site if possible—to at least seven or eight pounds per foot super, and the rolls should be hollow rolls. Milled lead should not be used on old buildings. It is as well to remember that lead should not be laid on oak boards or cement without some intervening substance as both materials quickly decompose the lead, turning it to whitelead powder.

Glass.—Great care should be taken to preserve ancient stained and clear Crown glass. It should never be removed from the windows in which it is found, however rough and imperfect it may be or however small the fragments, unless under special direction. It should be repaired carefully in its place.

Painting.—All remnants of ancient painting should be protected, and their preservation or cleaning should not be attempted unless under special direction; above all no attempt should be made to touch them up.

Ironwork.—All remnants of ancient metal work such as hinges, locks, casement fastenings, etc., should be preserved in their place if possible and old saddle-bars or stanchions should never be removed from windows except under instructions from the architect. Ordinary iron dowells or clamps should not be used where ancient ironwork, fixed into stone, is likely to split or has already split the stone. The ironwork should be removed carefully and metal substituted which will not corrode. In the case of ancient stanchions and saddle-bars in windows, copper ends should be electrically welded or riveted on to the iron bars and carefully re-fixed.

Generally it needs to be borne in mind that the reparation of an ancient church or of any other ancient building, however simple it may be, is a work to be entered upon in a totally different spirit from that in which a new work is approached.

The object is not only to put the work into good repair, but to preserve and perpetuate an authentic specimen of the ancient crafts of our country. Every ancient building has historical value, and even though at first sight its state of disrepair may suggest renewal, or that the work might be better executed if done anew, it must be remembered that *all that value is gone when authenticity is destroyed*, and that not renewal but preservation is the duty of those charged with the work.

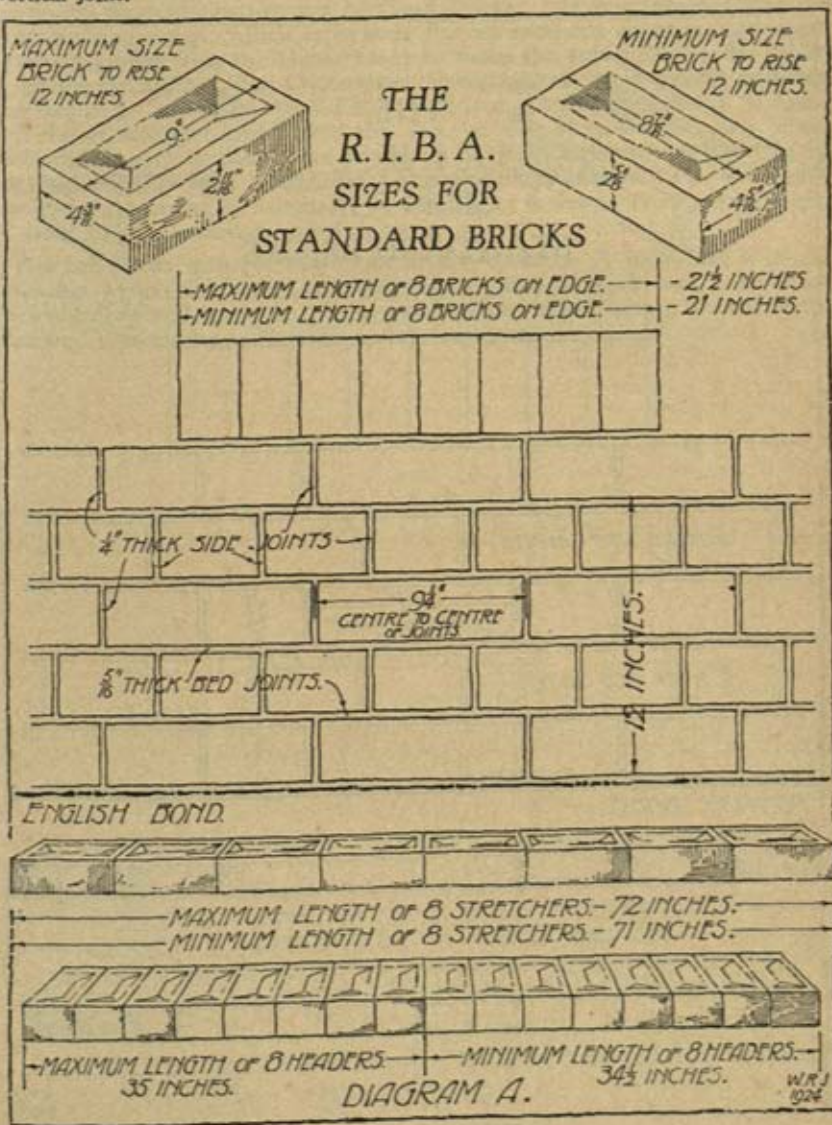

SIZES FOR STANDARD BRICKS

(Not intended to apply to facing bricks.)

(The diagrams are printed from blocks lent by the publishers of *Specification*.)

The accompanying diagrams illustrate sizes of standard bricks which have been agreed upon with various bodies. No. 1 (Diagram A) was agreed upon between the Institute and the Brickmakers' Association and was drafted as follows in consultation with these bodies and with representatives of the Institution of Civil Engineers in 1904:—

1. The length of the brick should be double the width, plus the thickness of one vertical joint.

2. Brickwork should measure four courses of bricks and four joints to a foot.

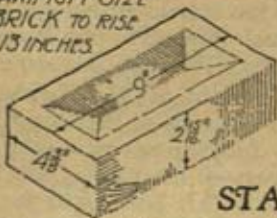

Joints should be $\frac{1}{4}$ inch thick and an extra $\frac{1}{8}$ inch, making $\frac{3}{8}$ inch for the bed joints to cover irregularities in the bricks. This gives a standard length of $9\frac{1}{4}$ inches centre to centre of joints.

The bricks, laid dry, to be measured in the following manner:—

(a) Eight stretchers laid square end and splay end in contact in a straight line to measure 72 inches.

(b) Eight headers laid side to side, frog upwards, in a straight line to measure 35 inches.

(c) Eight bricks, the first brick frog downwards and then alternately frog to frog and back to back, to measure $21\frac{1}{2}$ inches.

A margin of 1 inch less will be allowed as to (a), and $\frac{1}{2}$ inch less as to (b) and (c). This is to apply to all classes of walling bricks, both machine and hand-made.

In the early part of 1919 the Institute was requested to make some variations in the standard, and after consultation with the allied societies a conference was held on 28th June 1919, at which were present representatives of the R.I.B.A., the Institute of Clayworkers, the President of the Northern Federation of Building and Engineering Brick Trades, the Secretary of the Employers' National Council for the Clay Industries, and representatives of the South-Western District and Midland District. It was reported that the Northern Federation, which represents the six northern counties, had come to an agreement with the Government to make the standard size for bricks $2\frac{1}{4}$ inches in height. The Conference recommended that a second standard size should be added to the R.I.B.A. standard, all the dimensions to agree with the present standard except that four courses of bricks and four joints are to measure 13 inches. The maximum depth of eight bricks, laid frog to frog and back to back alternately, to measure $23\frac{1}{2}$ inches. The minimum depth of eight bricks laid similarly to measure 23 inches. This was approved by the R.I.B.A. Council on 21st July 1919.

The bed joints with the maximum bricks would be $\frac{1}{4}$ inch, and with the minimum $\frac{1}{8}$ inch to give 13 inches to four courses of bricks and four joints. This standard will apply to the counties of Northumberland, Cumberland, Durham, Westmorland, Yorkshire and Lancashire.

THE CUBING OF BUILDINGS

On account of the wide divergencies in the systems at present employed by architects for the cubing of buildings, the Practice Standing Committee decided to draw up standard methods of measurement for the guidance of members of the Institute.

In addition to the general advantages to be gained from the cubing of buildings by standard methods, their application would—

(1) Simplify the comparison of approximate estimates of cost ; and

(2) Ensure that the cubic contents of buildings submitted in architectural competitions were all calculated on the same basis.

In order that the Committee should receive as much assistance as possible in the pursuance of its purpose, Members of the Institute were requested in May 1926 to fill in and return to the Secretary the following two forms :—

(a) A Questionnaire ; and

(b) A Schedule.

A Sub-Committee appointed by the Practice Standing Committee have devoted much care to the scrutiny and analysis of the returns, which have been of considerable value to the Committee in formulating the Standard Methods of Computation here set forth.

NO. 1. LENGTH AND WIDTH MEASUREMENTS.

To be taken between the outer faces of the walls.

NO. 2. HEIGHT MEASUREMENT.

To be taken from the top of the concrete foundation to (*in the case of a pitched roof*) :

a line midway between the point of intersection of the outer surfaces of wall and roof, and the apex ; or

(*in the case of a flat roof*) :

In the case of a Mansard roof, its cubic contents are to be calculated separately.

VII. LIBRARY & PUBLICATIONS

THE LIBRARY

THE R.I.B.A. Library which contains about 40,000 volumes is probably the most complete collection of architectural books in the world. The books are arranged in three series. The main series consisting of all books in general demand, a store room series of little used books and an early works and rare books series which includes all books which on account of their rarity or quality deserve special care. The Loan Library, of books which may be taken out of the Institute building, consists of duplicate copies of books in the main series. Particular care is taken to keep the loan collection up to date and stocked with sufficient copies of books to meet the demand.

All the books in the library with a few exceptions are on open access.

A guide to the library has been published describing the method of classification and indexing; readers who wish to take full advantage of the possibilities of the library are advised to read it.

From the 1st October till the end of June the Library is open from 10 a.m. to 8 p.m. (Saturdays 5 p.m.); in July and September it closes at 7 p.m. (Saturdays 2 p.m.). The Reference Library is closed during the whole of August, but the Loan Library is open daily between the hours of 12 noon and 2 p.m. (Saturdays 12 noon to 1 p.m.), and the Periodical Room is open daily between the hours of 10 a.m. and 5 p.m. (Saturdays 10 a.m. to 1 p.m.).

GENERAL NOTES ON THE USE OF THE LIBRARY.

1. The Library is primarily for the use of Members of the Institute (Fellows, Associates and Licentiates). Probationers and Students, on registration in the books of the Institute, are furnished with a card of admittance to the library which they must bring with them and show if required to do so by the librarians. Cards are also granted on the recommendation of members of the Institute, heads of colleges and schools and other suitably qualified sponsors, who are required to certify, on a form to be obtained at the Institute, that the persons they recommend are fit to be admitted to the privileges of the Reference and Loan Libraries.

2. All readers are requested to sign the Attendance Book either in the Periodical Room or the Main Library. One signature only is required from each reader in any single day however many visits he makes.

3. The Study room is particularly intended for the use of readers making prolonged research. Application for its use should be made to the librarians. The room contains lockers in which readers can keep their papers.

4. A Reader can reserve a seat during temporary absence from the library by placing a hat, note book or some other personal articles on the chair. If a Reader is absent for more than an hour when the library is crowded the librarian may free the seat for use by another reader.

5. Readers are requested not to replace books on the shelves unless they are absolutely certain of the exact places from which they were taken.

6. All books left on tables and not obviously in actual use are liable to be replaced on the shelves by the staff. Readers who wish books to be kept out for them during temporary absence can reserve them by placing a slip of paper with their name on it on the volumes. Books so reserved may be recovered for use by another reader if urgently wanted.

LIBRARY RULES.

1. No book or other work forming part of the Reference Library is allowed to be taken from the premises of the Institute, except by special permission. Permission will not be given except in cases of the utmost urgency.

2. Readers desiring to trace must apply to the librarians for permission. Sheets of cellophane will be supplied to protect valuable works while they are being traced. Soft pencils only may be used. No compasses or dividers may be applied directly to any book or drawing, and the use of ink is prohibited at any table on which valuable works are placed.

3. Marking any book by writing, turning down leaves, etc., is strictly prohibited; this applies even to correction of a misprint, or to a single additional mark to a book, however much previously disfigured.

4. Quietness in the Library is essential, and all conversation should be conducted in an undertone.

5. Not more than one volume at a time is issued to any one borrower, except by permission of the Librarian, and no volume may be retained longer than fourteen days, unless permission has been obtained from the Librarian.

6. Books are not sent by post to readers who live or work within the London Postal area.

Books sent by post are dispatched at the cost of the Institute and returned at the cost of the borrower.

7. A borrower is required to sign a voucher for each book he takes out, and is responsible for the work so long as the voucher remains uncanceled. A book will not be accepted as returned unless it be delivered by hand to the official in charge at the Library during Library hours. In the case, however, of a member or student of the Institute borrowing through the post, his letter of request shall be countersigned by the Librarian on the day when the volume is dispatched, and shall be regarded as the borrower's voucher. On the return of the book the Librarian shall at once send the member a receipt. Books due for return on days when the Library is closed must be returned on the first following day when it is open.

8. Application for renewal must be made personally or by postcard in sufficient time to allow of the book being punctually returned if it cannot be renewed; if renewed, a written renewal from the Librarian will be sent, which must be produced when the book is returned.

9. A fine of 3*d.* must be paid for every week or part of a week during which any volume is retained beyond the date of return stamped on the volume, or the date authorised after application for a renewal.

A borrower whose fines are unpaid will not be permitted to use the Loan Library and, if not a member of the Institute, he will also be debarred the use of the Reference Library.

10. A borrower is liable to be called upon to replace at his own expense any work lost, marked, or injured while in his possession or to pay a fine, and is expected to wrap the book for postage so as to assure every reasonable protection.

BUILDING SURVEYING EXAMINATIONS. EXAMINATION QUALIFYING FOR CANDIDATURE AS DISTRICT SURVEYOR IN LONDON.

The London Building Act, 1930, cap. clviii, sect. 156, provides :—

The Royal Institute of British Architects may cause to be examined by such persons and in such manner as they think fit all candidates presenting themselves for the purpose of being examined as to their competency to perform the duties of District Surveyor, and shall grant certificates of competency to the candidates found to deserve them, and a person who has not already filled the office of District Surveyor shall not be qualified to be appointed to that office unless he has received a certificate of competency from that Institute or has been examined in such other manner as the Council may direct and been found competent.

The Candidate must be prepared to answer orally, in writing, and by means of drawings, questions upon the following points in order to satisfy the Board as to his competency for the office of District Surveyor.

1. Graphic Question. To test the Candidate's general knowledge of planning and construction of buildings, a site plan will be supplied on which he will be expected to develop the layout of a building with the main constructional features, and illustrate these by sections. The provisions of the London Building Act must be complied with. A high standard of draughtsmanship is not expected.
2. At least two compulsory questions will be set relating to buildings of metal skeleton and reinforced concrete construction. Candidates must, therefore, be intimately acquainted with those provisions of the London Building Act, 1930, that have reference to buildings of metal skeleton construction, and also with the regulations thereunder relating to reinforced concrete buildings.
3. The materials most in use in building, their mechanical properties and composition, distinction between good and inferior materials, nature and prevention of decay to which they are subject, and simple tests for quality such as can be made on the site of works. The bonding of masonry and brickwork, use of mortar and cement, framing of carpentry.
4. The design of arches, retaining walls, the different parts of timber, reinforced concrete, steel and other structures, and the modes of calculating stresses in them, especially such rapid modes as can be employed readily on the site. The testing and fixing of constructional steel work. The force of storms and stability of high structures.
5. Foundations in various kinds of soil, and precautions to be taken, expedients when the bottom is bad or under water. The risks of accident due to interference with foundations after they have been put in, or to increasing the load on them. The foundations of high chimney shafts. Indications of the failure of foundations.
6. Common defects in construction. Decay of structures. Neglected and dangerous structures. Shoring, underpinning, repair of walls, tying buildings together, and forming openings in existing walls.
7. The behaviour of various materials and modes of construction with reference to fire. Fire-resisting construction. Precautions necessary in heating and lighting buildings. Precautions to be taken in the storage of water.
8. The London Building Act, 1930, together with the regulations thereunder and the Bye-laws in force. The ordinary procedure thereunder. Defects or deficiencies in plans for a proposed building.

The Examination is held twice a year, in the months of April or May and October. Application forms, to be filled up by persons desirous of being examined, can be obtained free of charge at the Office of the Royal Institute.

For particulars as to attendance, fees, etc., see page 769.

CONDITIONS OF THE APPOINTMENT.

No person is accepted as a candidate for the appointment of District Surveyor unless he shall have attained twenty-eight years of age and be under fifty years of age, and every candidate must deliver with his application satisfactory evidence of his age.

Every candidate is required to sign a declaration and deliver it with his application that he becomes a candidate, and will accept the appointment if he should be appointed, on the following understanding :—

- (a) That he will personally discharge the duties of the office, subject to Section 158 of the London Building Act, 1930.
- (b) That he will give his whole time to the duties of the office.
- (c) That he will not during his continuance in office (except in the discharge of the duties thereof) carry on business as an architect, surveyor or builder, or directly or indirectly, as a partner or otherwise, be interested in such business.
- (d) That he will keep his District Office open from Monday to Friday (both inclusive) between the hours of 9.30 a.m. and 5 p.m., and on Saturday from 9.30 a.m. until 1 p.m. and give his personal attendance there daily from 9.30 to 10.30 a.m.
- (e) That, in the event of any change in the status or terms of appointment or the duties of district surveyors being made by statute, he agrees that he shall not be entitled to compensation for any loss which he may sustain either in consequence of his continuing to hold office under such altered conditions or of his resignation due to his non-acceptance of such altered conditions.
- (f) That he will in any event retire on his attaining the age of 65 years.

Every appointment of District Surveyor is subject to the person appointed passing satisfactorily a medical examination by the Council's medical officer.

The County Council reserves to itself the exercise of its powers of dismissal if the District Surveyor so appointed should not act consistently with the understanding above set forth in any of the matters referred to therein, or for other sufficient reason.

THE R.I.B.A. LONDON ARCHITECTURE MEDAL.

With a view to encouraging excellence of design in street architecture it has been decided to examine annually the buildings built during the three years ending 31st December, within a radius of eight miles from Charing Cross, and to award a Medal for the design of a building of exceptional merit.

THE MEDAL.—The architect of the selected building will receive a bronze medal, presented by the Royal Institute, together with a diploma signed by the Jury. A suitable tablet will be affixed to the chosen building.

CONDITIONS.—(a) The building must front to a street, road, square or court, to which the public has access. (b) The architect whose name is submitted must himself be the designer of the building. (c) Any member of the Royal Institute shall be at liberty to nominate any building for consideration by the Jury. Forms of Nomination will be issued with the first two numbers of the Journal in each Session. These forms must be in the hands of the Secretary R.I.B.A. by the end of February. The Jury do not bind themselves to confine their selection to the buildings nominated.

PRESENTATION.—The presentation of the medal to the architect will be made annually at a meeting of the Royal Institute, of which the date will be announced in the Press.
